32 AND 33 South Market St. 19 Chatham St. BOSTON, MASS.

WE ARE NEW ENGLAND HEADQUARTERS FOR

Syracuse Chilled Plows.

Syracuse Cultivators and Harrows.

Adriance Buckeye Mowing Machines.

Deering's Ideal Mowers, Reapers, Rakes and Hay Tedders.

Belcher & Taylor Combination Tedders.

Coldwell Imperial Lawn Mowers.

Coldwell Horse Lawn Mowers.

Iron Age Cultivators and Seed Drills.

FOR DESCRIPTIONS SEE PAGES 68 TO 93.

We carry in stock a FULL LINE OF REPAIRS
for these and all other leading Plows,
Harrows, Cultivators, Mowers,
Rakes, Tedders, etc., etc.

G R E E T I N G

We take this opportunity to thank our friends and patrons for the many favors, and we desire to say that we will use every endeavor to please them and all others who favor us with orders, large or small.

The efforts to establish a reputation for dealing in FIRST QUALITY GOODS ONLY have met with success, and we are confident that by pursuing the same course in the future, as we have in the past, our business will continue to increase, and our methods will meet with approval from all discriminating purchasers.

CAREFUL TESTS OF OUR SEEDS have been made to ascertain their growth. Testing has always been practiced by us and is one of our many methods to maintain a high standard of quality.

WE ARE THE ONLY HOUSE IN NEW ENGLAND carrying a full stock of Seeds, Tools, Implements and Repairs for the wants of the RETAIL TRADE EXCLUSIVELY. Cheap goods for country store trade we do not handle. Personal attention to business, prompt shipments, reasonable prices, FIRST QUALITY GOODS, have built up a business and given a reputation of which we are proud. The same course will be pursued in future to maintain that reputation as was in the past used to obtain it.

SITUATIONS WANTED.

We will be pleased at all times to receive inquiries from any person desiring the services of Gardeners, Farmers or Assistants. We keep a list of reliable persons wanting such situations, and recommend only such as we think are competent to meet the requirements of employer. We make no charge for our services.

We inform all former patrons that we can and will use them just as well in the future, and we trust that those who have not yet traded with us will give us a trial.

Yours truly,

THOMAS J. GREY, President & Treas. PETER M. MILLER, Secretary JOHN P. A. GUERINEAU, Manager

THOMAS J. GREY CO.

Remarks to Purchasers.

Send Early Orders and there will be no cause for complaint at delays in their execution.

Orders from Unknown Parties, to insure prompt attention, must be accompanied by a remittance, or by satisfactory reference to some responsible house or person in this city.

Our Terms are Net Cash. All pills on which short credits are allowed are due the first of the month succeeding the date of purchase. Lills on which longer time is desired must be provided for by special agreement.

Prices, Etc. As prices of some varieties of seeds will doubtless vary during the year, we beg to assure purchasers that ours shall be at all times as low as any for seeds of like good quality. Quotations, with samples, will be cheerfully given for such variable articles as grass and clover seeds, onion sets, etc.

Remittances may be made by Draft, Money Order, American Express Company's Money Order, Cash by Express, or in Registered Letter. Postage Stamps may be sent for moderate amounts.

Seeds by Mail. We send all seeds ordered at ounce or packet rates, free of charge for postage. All heavy seeds, including peas, beans, corn, clover seed, seed grain, roots, etc., are quoted at net prices at our store. Purchasers desiring these by mail are requested to remit an additional amount sufficient to cover the postage at the rate of 8 cents per pound, or 15 cents per quart.

Address, Etc. In ordering, please use the order sheet which we send with each catalogue, and be particular to sign your name, also that of your post office, county and state, plainly; also mention the mode of conveyance you prefer.

Liberal Premium on Seeds in Packets When the order is accompanied by the money, purchasers of seeds in packets at catalogue prices may select 25 cents worth extra packets for each \$1.00 sent. Thus, any one enclosing \$1.00 may order seeds in packets amounting to \$1.25. Two Dollars sent us with the order will pay for seeds in packets amounting to \$2.50, and so on. Please remember this discount applies on packets only.

Cloth Bags used in Packing are charged at the following rates: Quarter bushel, 8 cents; half bushel, 10 cents; one bushel, 15 cents; two bushels, 22 cents. If returned, clean and in good condition, free of expense, they will be credited as charged. In remitting for seeds by the peck and over, please add a sum to cover cost of the necessary bags.

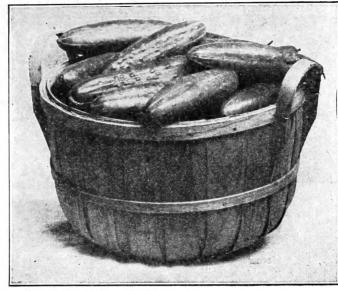

Our Guarantee: While we exercise the greatest care to have all seeds pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the seeds on these terms and conditions, they must be returned at once, and the money that has been paid for same will be refunded.

Kindly send us a list of your friends who use seeds and bulbs, and we will be pleased to mail them our catalogues. Our new Bulb Catalogue will be ready we September.

THE DAVIS PERFECT CUCUMBER.

As a foreing cucumber the Davis Perfect has no equal. Its excellent eating qualities, shape, color and productiveness place it without a rival. To obtain the best results for forcing under glass the plants should not be planted as close together as other forcing strains. It is a very vigorous grower and if planted too close will not do as well. Mr. Davis places his plants about five feet apart.

It is a shy seeder. We recommend for the market gardener as well as for those who grow cucumbers

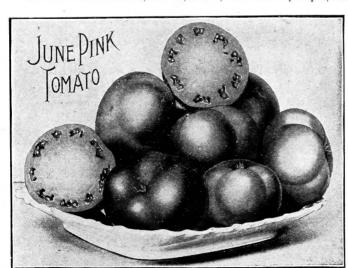

for their own use either under glass or garden. Pkt. 10c., oz. 25c.

JUNE PINK TOMATO.

The June Pink Tomato in habit of growth is similar to the Earliana. The plant is neat and compact, branching freely, with fruit hanging in clusters of six to ten fruits both in the crown and at the forks of the branches. Under exactly the same conditions as given Sparks' Earliana and Chalk's Jewel, the June Pink yielded as much fruit as either, and the vines after the crop had been harvested were greener and brighter, and showed no tendency to blight. It ripens fully as early as the Sparks' Earliana and quite ten days to two weeks ahead of Chalk's Early Jewel.

The fruit is of medium size, uniform, smooth, and attractively shaped, without cracks or any green

core The fruit will average 2\frac{3}{4} to 3 inches in diameter, and from 2 to 2\frac{1}{2} inches in depth. The skin is reasonably tough, so that it is excellent for shipping purposes.

In color, it is a bright pleasing pink, and in markets where a pink tomato is desired will bring 25 percent. more in price than any red variety. It has the further quality, making it especially desirable for private use, of continuing to be ar and ripen fruit up until frost.

10c. pkt., \$1.25 oz.

VEGETABLE SEED SPECIALTIES.

BEANS.

Giant Stringless, Green Pod. Color deep green, very long, round, fleshy pods; very prolific and entirely stringless. Pkt., 10c.; Qt., 30c.

Stringless Refugee Wax. Pods round, extra long, quality very fine, perfectly stringless. Pkt., 10c.; Qt., 35c.

Non Plus Ultra. An extra fine forcing variety; compact growth and very prolific. Qt., 50c.

ONION.

Ailsa Craig. A remarkably large, oval-shaped variety with pale straw colored skin; splendid exhibition sort. Pkt., 15c.; Oz., 50c.

PARSLEY.

Grey's Perfection. Extra curled. We believe this to be the best parsley grown for exhibition or table use. Pkt., 10c.; Oz., 25c.

PEAS.

- Carter's Buttercup (New). A very fine and robust main crop pea. It bears as many as twenty to twenty-two pods on a single vine, ready at one time. Height 2 ft. Qt., 75c.
- Carter's Mayflower. A new prolific first early pea; extra fine, bearing very large pods freely produced on robust vines. Height 18 to 24 inches. Qt., 75c.
- Admiral Dewey. Large podded. Height 3½ ft. One of the best late varieties. Qt., 35c.; peck, \$2.25.

TOMATO.

Comet. One of the best forcing varieties. Brilliant scarlet color, medium size, excellent shape and solid; good outdoor variety. Pkt., 20c.; Oz., \$1 00.

CARTER'S WORM ERADICATING FERTILIZER

For Lawns, Tennis Grounds, Golf Courses, etc., etc.

This preparation not only destroys the worms but fertilizes the grass, producing a rich, velvety turf. It is used by all the principal golf clubs in the United States and on many of the finest private lawns, etc., and has invariably given the greatest satisfaction. It requires about a half pound of the preparation per square yard of turf. No chemicals are used in this preparation, and it is absolutely harmless to animal life. Prices, per ton lots or over, \$75.00; per half ton, \$40.00; in sample bags of 100 lbs. each, 5c. per lb., which is also the price for anything up to half a ton.

FROM THE COUNTRY CLUB, BROOKLINE, MASS.

We note that the balance of Carter's Worm Eradicator and Fertilizer is at hand. In this connection we beg to advise that it is the best thing of its kind that we have ever used for our putting greens.

ever used for our putting greens.

Besides being a perfect worm destroyer, it is invaluable as a fertilizer, making a rich, velvety turf, and after an experience of two years we unhesitatingly endorse it

in every respect. Very truly yours,

C. E. RUSSELL, Superintendent.

FLOWER SEED SPECIALTIES.

ASPARAGUS.

Plumosus Nanus. This graceful climbing asparagus has taken the place of smilax in nearly all fine decorations, as it is much more graceful, its foliage being finer than that of the most delicate fern. It makes a fine house plant, and the foliage will last cut from two to three weeks. Pkt., 25c.

Sprengeri. One of the best basket plants for house, greenhouse, or outdoor culture in summer. The fronds are now considered indispensable in all fine decorations. Grows readily from seed. Pkt., 10c.

Orange King.	A new color in Primula; very fine	44	50 c

DAHLIAS.

These grand, fall-blooming plants delight in a sunny situation and rich soil. They should not be set out till May. Lift the bulbs immediately after the first frost. Dry off and store during winter in dry sand in a warm place.

Our collection of Dahlias embraces only the very best varieties. Undernoted are a few of the leading sorts. Plants ready to send out about May 1st.

Show and Fancy.

Apple Blossoms. A very pretty new variety that combines all the shades found in the apple blossoms.

A. D. Livoni (Ethel Vick). Soft seashell pink; quilled petals; full to the centre.

Arabella Pale primose, tipped and shaded rose and lavender.

Dr. J. P. Kirkland. Dark crimson.

Keystone. Pink, striped crimson.

Mrs. Langtry. Yellow, deeply edged with crimson.

Mrs. Dexter. Salmon.

Miss Miller. Pale yellow, shading dark-

Meteor. Bright red, very large.

Orator. Salmon buff.

Pearl. White, deeply edged with rose.

Puritan. White, striped maroon. Queen Victoria. Canary yellow.

10c. each; \$1.00 per doz.

Alice Emily. Buff yellow, large and fine. Arian. Crimson scarlet.

Fascination. Rose pink, sometimes striped white.

John Thorp. White at base, deeply edged with pink.

Lucy Faucett. Pale yellow, striped magenta.

Margaret Bell. Magenta.

Robert Broomfield. Pure white.

Statesman. Deep crimson.

15c. each; \$1.50 per doz.

Cactus.

Beatrice. Pale rose. Captain. Soft red, tinted apricot. Cannell's Gem. Deep orange. Dr. Jameson. Deep crimson. Earl of Pembroke. Bright plum. Ernest Glasse. Purple magenta. Harmony. Reddish bronze. Innovation. Rich crimson, tipped pure white.

Island Queen. Light mauve. Keyne's White. Pure white. Mrs. Chas. Turner. Clear soft yellow, very large. Mrs. M. A. Holbroke. Velvet crimson. Mrs. Bennett. Soft crimson. Mrs. Barnes. Pale primrose. Startein Krone. Cardinal red.

15c. each; \$1.50 per doz.

Cactus. Continued.

Arab. Rich, velvety maroon, almost black

Brumhilde. Rich plum color.

Bedenia. Clear bright orange, striped and flaked red.

Britannia. Soft salmon pink.

Countess of Lonsdale. Deep salmon red. One of the best.

J. Weir Fife. Very dark maroon.

Kriemhilde. Pleasing shade of pink, centre almost white; extra fine.

Mayor Tuppeny. Orange-fawn, centre vellow.

Mary Service. Pinkish apricot.

Octopus. Nearly white, showing a tinge of lavender; very large.

Porcupine. Scarlet maroon.

Prince of Yellow. Soft shade of yellow.

Queen Alexandra. Deep orange distinct. Standard Bearer. Fiery scarlet.

Stella. Rich, vivid crimson.

Wm. Treseder. White, shaded pink.

25c. each; \$2.50 per doz.

Clara G. Stedwick. Clear, bright salmon, shading yellow at base of petals. Flamingo. Clear flame color.

General Buller. Rich velvet crimson, nearly black at base, with white tips.

Jealousy. Clear yellow. King Edward VII. Bright cherry red. Mrs. J. H. Luscomb. Rose mauve with a light centre.

Monarch. Orange red, tipped magenta. Richard Dean. Vermilion scarlet, blotched and tipped white.

Vesta. Clear shade of pink.

35c. each; \$3.50 per doz.

Decorative.

Amphion. Chrome yellow shaded cherry red.

Beauty of Brentwood. Plum color, striped darker.

Clifford W. Bruton. Bright yellow.

Delicata. Light salmon, shading to pink. Dolly. Flesh color.

Grand Duke Alexis. Pure white, edged lavender, 20c.

Germania. White, tinted flesh.

La Favorite. White.

Lyndhurst. Fiery scarlet.

Miss Barry. Deep magenta.

Maid of Kent. Cherry red, tipped white.

Nymphæa. Clear shrimp pink, tinted lighter. (Water Lily Dahlia.)

Oban. Mauve.

Wm. Agnew. Rich, dazzling red.

Zulu. The black dahlia. Dark maroon.

10c. each; 1.00 per doz.

Pompon.

Ariel. Orange buff.

Bobby. Plum color.

Catherine. Bright yellow.

Darkness. Dark maroon.

Fascination. Pink and lavender blotched

Little Jennie. Primrose yellow.

Little Bessie. Creamy white.

Purity. Pure white.

Prince Charming. Cream, tipped purple.

Red Indian. Deep coral red.

Star of the East. Clear white distinct.

Vivid. Bright scarlet.

10c. each; \$1.00 per doz.

GLADIOLUS.

This is one of the most extensively grown bulbous plants that adorns our gardens in the fall. The soil should be rich, thoroughly forked, cultivated and well drained. The bulbs should be planted four inches deep and about six inches apart.

Our mixtures are made up from fine varieties, and are all selected first size

IMP. SOAP SPRAY.

This spray contains vegetable poisons, harmless to plants, but peculiarly effective against red spider on fruit, etc., the rhododendron fly, rose bug, and other insect pests on fruits, flowers and foliage. The base is a pure soap. It sticks but can be easily washed off before marketing. 1 qt. 50 cts.; 1 gal. \$1.50; 5 gals. \$6.00; 10 gals. \$10.00.

When seeds are ordered to be sent by mail, customers will please remit eight cents per pound or fifteen cents per quart, to cover cost of postage, except for packets and quantities less than one quarter pound, which we will mail free of postage.

ARTICHOKE. (Artischoke.)

One ounce will produce 500 plants.

The Globe Artichoke is cultivated for its flower-heads, which are cooked like Asparagus. Plants set in any good garden soil, about three feet apart, with slight covering in winter, will remain in bearing along time.

Large Green Globe. The best variety; heads large and scales	1 20,	02. 20.

Jerusalem Artichoke. (Helianthus tuberosus). Cultivated for its		
tubers Qt	., .20	Peck, 1.00

ASPARAGUS. (Spargel.)

One ounce will produce 200 plants.

A deep, rich, mellow soil is best adapted to the growth of asparagus. It may be grown from seed or propagated by roots. Sow as early in the Spring as the ground will admit, in drills from twelve to fourteen inches apart, and cover one inch deep; when the plants are well up, thin to three inches apart in the drills. Keep the plants free from weeds during Summer, and protect slightly during Winter.

The following Spring, the roots will be ready to transplant into permanent beds; the roots should be set in rows three to four feet apart, and one foot apart in the rows; the crown of the root should be four to six inches below the surface of the ground. A fair crop may be expected the third year from the seed, or in one to two years when roots

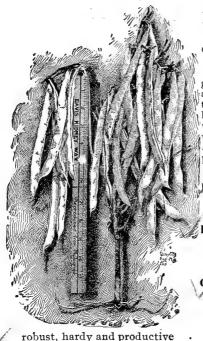

are used, according to the age of the roots planted. By planting two-year old roots a fair crop may be obtained in one year, and after that a full crop every year.

Two-year old Asparagus Roots are too bulky to send by mail. The prices quoted for one-year old roots include postage; two-year old roots by express at the expense of the purchaser.

BEANS, DWARF OR BUSH.

(Busch-Bohnen.)

One quart will plant 100 feet of drill. One and one-half bushels will plant one acre.

A warm, light soil is best adapted to the growth of Bush Beans, but they will do well in almost any situation, unless it be very wet. Sow two inches deep in drills three to three and onehalf feet apart; keep the ground free from weeds and cultivate often. Never disturb the vines when wet, as the pods will become rusty. All the varieties are tender, and must not be planted until the soil is dry and warm.

BEET. (Runkel Rube.)

One ounce will sow 50 feet of drill; five to six pounds for an acre-

A deep, light, sandy loam that has been well enriched is best adapted to the growth of the beet. Sow in drills, from April to June, sixteen inches apart, and about one inch deep; thin the plants to about six inches apart. The turnip-rooted are the best, and all early varieties are used extensively for greens.

Grey's Blood Turnip. One of the very best strains for Market Gardeners, small top, round, handsome, and very dark red. Pkt. 5c. Oz. 10c. Lb. 75c.

Eclipse. Early globe shaped, dark red, small top, smooth roots.

Pkt. 5c. Oz. 10c. Lb. 60c.

Edmands. Deep blood-red color, round and smooth; excellent quality; highly recommended. Pkt 5c. Oz. 10c. Lb. 60c.

Dirigo. A rich blood-red variety, of

ane grain and flavor. Extra early. ECLIPSE BEET. Pkt. 5c. Oz. 10c. Lb. 75c. Pkt. Oz. Lb. Crosby's Egyptian. One of the earliest dark-red varieties; fine quality. Very popular among Market Gardeners. .05 .10 .75 Detroit. Round and smooth, deep red; very tender .05 .10 .75Dewing's Blood Turnip. Of fine form and flavor, deep blood .50 red. A desirable variety .05.10 Bassano. Early, flat, light color, standard variety .05.10 .50 Bastians. Of quick and large growth; bright red color .05 .10 .50 Long Smooth Blood. Large, late; deep blood-red; best for Winter use; sweet and tender .05.10 .50 Swiss Chard. The leaves of this variety are used as spinach, and the mid rib of the leaf, cooked and served up like asparagus, is delicious .05 .10 .75 Beet for Greens. The small plants make delicious greens .05 ,10 .40

SUGAR BEETS AND MANGEL WURZEL.

Six pounds of seed will sow one acre.

Lane's Improved Sugar Beet. Large, hardy, productive and excellent quality. Oz. 10c. Lb. 40c.

Silesia White Sugar Beet. Grows to a large size, and is useful for making sugar, as well as for stock-feeding. Oz. 10c. Lb. 40c.

Grey's Prize Long Red Mangel. The most largely grown of any of the Mangels; roots attain an enormous size, producing thirty to fifty tons to the acre; quality superior; the best for deep soil. Oz. 10c. Lb. 40c.

Golden Tankard Mangel. The flesh is bright goldenyellow; very large, and will produce more mangels to the acre than any other variety; excellent for feeding stock. Oz. 10c. Lb. 40c.

Gian. Yellow Intermediate Mangel. A very large yellow sort, of good quality, and produced in great abundance. Oz. 10c. Lb. 40c.

Red Globe. Similar to the above except in color .

Yellow Globe. A large, round, orange colored variety of excellent quality:
good keeper; best for shallow soil. Oz. 10c. Lb. 40c.

BORECOLE, or KALE. (Blatter Kohl.)

One ounce will produce 1500 plants.

Of all the cabbage tribe this is the most tender and delicate. Early plants may be started in the hot-bed, or the seeds may be sown in the open ground in April or May; transplant in June, into rows, and cultivate the same as cabbage.

Dwarf Green Curled. One of the best; very hardy and improved Pkt. Oz. Lb. by a moderate frost .75 .10 German Greens, or Sprouts. Sow in the Fall in rows one foot

apart and cultivate like Spinach. A very hardy variety and

much esteemed by market gardeners
Large-Seeded Spring. Used only for early greens, and should be .75 .10 sown in rows eighteen inches apart, as early as the ground .05 can be worked .30

BRUSSELS SPROUTS.

CABBAGE. (Kopfkohl.)

One ounce produces about 3,000 plants.

For early use a sowing may be made in the hot-bed in February or March; and for Winter use seed should be sown in the open ground in May or June. When the plants are five or six inches in height, transplant into rows three to three and one-half feet apart, setting the plants from two to three feet apart in the rows, according to the variety. A deep rich loamy soil is best adapted to the growth of this crop, and if large fine heads are expected, the land must be prepared by very heavy manuring. A handful of wood ashes thrown into the forming heads will not only keep off the cabbage-fly, but will assist the growth of the plants to a considerable extent. To preserve cabbages during the Winter, pull them on a dry day, and bury them in long trenches in a dry place, and cover with boards to keep off the rain.

BROCCOLI. (Spargel Kohl.)

One ounce will produce 2,000 plants.

This vegetable closely resembles the cauliflower. A very rich deep soil is required to grow the broccoli to perfection; the seed should be sown early in the Spring, and the plants transplanted into rows three feet apart with two feet between the plants.

Early Purple Cape. Heads of a greenishpurple color; close and compact, and of fine flavor. Pkt., .05; Oz., .40; Lb., \$3.00. White Cape. Heads compact, good size, and of a creamy white. Pkt., .05; Oz., .40; Lb., \$3.00.

BRUSSELS SPROUTS.

(Sprossen Kohl.)

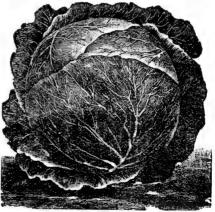

One ounce will produce 2,000 plants. Cultivated for the small heads that grow from the main stem; these small heads are firm and compact like little cabbages, and are considered a great delicacy by many people.

Cultivate the same as cabbage or cauliflower.

Improved Dwarf French. Tender and of
fine flavor; the best for general use.

Pkt., .05; Oz., .20; Lb., \$2.00.

Dobbie's Exhibition. Grows taller than the above; is of good quality and very productive. Pkt., .10; Oz., .25.

CABBAGE.—Continued.

tender, medium size	.05	.25	2.50

CARROT. (Moehre.)

One ounce will sow 100 feet of drill; three pounds required for one acre.

The carrot flourishes best in a good, light, well-enriched loam. Where there is a choice of situations, heavy and wet soils should be avoided, and preference given to the light and dry. For an early crop sow as soon as the ground is in good working condition; plantings for general crop may be made as late as June, but early sowings succeed best. The early, small-sized varieties may be sown in drills ten inches apart, but the larger sorts require at least eighteen inches between the rows; cover three-quarters of an inch deep and when the plants are well up, thin to six inches apart in the rows. As an agricultural root, the carrot is unsurpassed for feeding stock.

CITTED	ATTO THE	CARROT.

	Pkt.	Oz.	Lb.
Earliest French Forcing. A small round root; the earliest variety and good for forcing under glass	.05	.10	1.00

a good color at all stages of growth	.05	.10	1.00

CAULIFLOWER. (Blumen Kohl.)

One ounce will produce 3,000 plants.

The cauliflower, like the cabbage, requires a deep, rich soil, and seldom succeeds well when grown on land long under cultivation. Sow the seed in the hot-bed in March, and transplant into the garden in May; set the plants in rows and cultivate the same as cabbage. If the season is dry, water often, as cauliflowers cannot be grown to perfection without plenty of moisture.

	Pkt.	Oz.	1/4 Lb.
Early Snowball. A favorite early variety, very sure to head;			
considered by many the best variety in cultivation	.20	3.00	10.00
Earliest Dwarf Erfurt. One of the earliest varieties, very dwarf,

CODAL CALAD EDMINISTES	_		

CORN SALAD, or FETTICUS. (Ackersalat.)

Cne ounce will sow 100 feet of drill-

This excellent salad may be had the year round. Sow in September, in drills eight inches apart, covering the seeds lightly and protect from frost by a light covering of hay or litter. The seed may also be sown in spring.

Large-Seeded. The most popular variety grown. Pkt. 5 ets. Oz. 10 ets. Lb. \$1.00.

CRESS, or PEPPERGRASS. (Kresse.)

One ounce will sow 100 feet of drill.

A popular salad, which should be sown early in spring-very thickly in shallow drills-and at short intervals, for succession, as it soon runs to seed.

Extra Curled. The best variety grown; leaves are beautifully cut and curled; highly

prized for garnishing. Pkt. 5 cts. Oz. 10 cts. Lb. 60 cts.

Water. This wholesome salad may be grown in any moist situation, but more successfully by the edge of a running brook. The seed may be sown in May, on the ground where it is intended to be grown, and the thinnings transplanted. The plants should be set not less than a foot apart. The cress will be fit for gathering the second year. Pkt. 10 cts. Oz. 40 cts.

CHERVIL. (Kerbel.)

The Curled Chervil is cultivated like Parsley, and used for garnishing and flavoring soups and salads.

Curled Chervil. The young leaves are used for flavoring soups and salads. Pkt. 5 cts. Oz. 10 cts. Lb. \$1.00.

CORN.—Sweet, or Sugar. (Welschkorn.)

One quart will plant 200 hills; eight quarts will plant one acre in hills. One and one-naif bushels will sow one acre, in drills for solling.

properly selecting the varieties a continued supply can be had until frost kills plants.

STOWELL'S EVERGREEN.

Corn requires a mellow, loamy, well-pulverized soil, and frequent hoeings. Plant in hills three feet apart each way, dropping five or six kernels in each hill, or planted in rows three to four feet apart, and the plants thinned out to eight or nine inches in the row. From the beginning of May until the middle of July a succession planting can be made every two or three weeks, and by

Peck. Grey's Perfection. Earlier than Crosby, grows taller and has much Marger ears, very productive, sweet and tender. Especially recommended for market gardeners .10 .30 1.75Early Crosby. A popular variety; early, good size, and quick growth; white kernels, and one of the best for market gardeners . .25 1.25 .10 Early Cory. A very early variety, with good-sized ears and large grains; excellent for market

Cory White Cob. A selection from Red Cory, being equally as .25 1.25 early and having white kernels and white cob. Country Gentleman. Cob very small, with deep kernels of pearly .25 .10 1.25 whiteness. The finest of all sweet corns; quality delicious . .25 1.25 .10 Black Mexican. One of the sweetest and best varieties; grains black when ripe, but when in condition for the table cooks remarkably white .10 1.25 Potter's Excelsion. Fine large ears and deep grain; one of the sweetest varieties; popular with canners

Moore's Early Concord. Large handsome ears; quality faultless, .10 .25 1.50 being much like early Crosby .10 .25 1.25 Stowell's Evergreen. The finest late variety; ears twelve to sixteen-rowed, very large and remains fit for use longer than any other; the stalks are very tall and valuable for fodder . Peep-O-Day. This corn has two valuable points — extraordinary .10 1.50 earliness and unsurpassed sweetness. It may be used as an early or late variety with equal success .10 .25Egyptian. A large, late, long-eared variety; very sweet; remains green a long time; excellent for canning . .10 .25 1.50 Washington Market. Medium late variety. One of the best for general crop for market or private use. Ears of large size with 16 to 18 irregular rows. Kernels deep and tender. .10 .25 1.50 CORN, Field and Fodder. Prices subject to change. Qt. Peck. Bus. Early Canada. One of the earliest varieties; ear small; in ordinary 2.00 seasons the crop will be fully ripened in August .15 .65 Longfellow. This is the standard variety in this section; long ear, .652.00 .15 small cob, bright color, and medium early Early Sandford. Very early, ears white; makes a fine quality of .152.00 meal; good for fodder and ensilage .65King of the Earliest. The earliest yellow Dent Corn in cultivation; 2.00 .65 a safe sort for high latitude or late planting .15Leaming. Early yellow dent variety, with large, deep grain of dark .15 .50 1.75 green fodder than any variety we offer for soiling or ensilage purposes; short-jointed, and consequently yields an immense 1.50 amount of leaves and ears . .50 .10 Blount's Mammoth Ensilage. ENGLISH FRAME VARIETIES.

Sow in small pots in January or February, in the hotbed or greenhouse. When the plants have made three leaves, transplant into a previously prepared hill in the center of a hotbed, and cover with a glass sash. Keep a temperature of from sixty-five to eighty degrees. The following are very desirable varieties:

Rollinson's Telegraph.

Duke of Edinburgh.

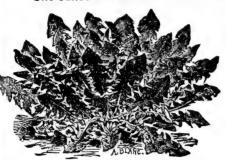

(For Forcing.)

1.50

1.25

DANDELION. (Lowenzahn.)

One ounce will sow 200 feet of drill; one pound will sow an acre.

Extensively used as early spring greens, and considered very healthful. Sow seed in May or June, in any good soil, in drills fifteen inches apart, upon beds made smooth with the rake. Cover very lightly and press the earth firmly upon the seed. Cultivate during the summer to keep down the weeds. Cover with litter upon the approach of severe weather, and remove the covering early in spring. If spare frames are at hand, they may be used to advantage by set-

ting them over a portion of the bed, and forcing the dandelions under them, thus forwarding a portion of the crop. Dandelions make an excellent salad if blanched by earthing-up, or placing boards to exclude the light.

American Improved. A stocky, thick leaf, hardy variety, grown largely for the Boston market; the best for general use. Pkt. .10; Oz. .50; ½ lb. \$1.50.

EGGPLANT. (Eirpflange.)

One ounce will produce 1,000 plants.

Sow in hotbeds very early in spring, and transplant when two inches high into a second bed or into small pots. If that is not done, thin to four inches apart. Do not plant out till the weather becomes perfectly settled and warm. Cool nights or wet weather will check them. Keep some back in frames for a second planting, in case of weather changing unexpectedly. Keep plants watered for a few days if the sun is hot when put out. Set out plants 3 feet by 2.

Black Pekin. Fruit globular, almost black in color, fine grained, and delicately flavored. Pkt. 10 cts. Oz. 40 cts.

Early Long Purple. A very early, hardy and productive variety of good quality. Pkt. 10c. Oz. 25c.

New York Improved. The best sort for general culture, and leading market variety; fruit large oval, very productive. Pkt, 10 cts. Oz. 40 cts.

NEW YORK IMPROVED.

ENDIVE. (Endivien.)

One ounce will sow 150 feet of drill.

A rather moist soil is preferred. Sow early in the Spring in drills twelve inches apart, and thin out the plants to ten inches apart in the drill as soon as they are large enough to handle. Before using the plants must be blanched, which is accomplished by gathering the leaves to a point at the top and tying them together with matting or any soft material. It makes a most delicious salad.

Green Curled. A very hardy, dark green, closely curled variety,	Pkt.	Oz.	Lb.
tender and crisp	.05	.20	2.00
Moss Curled. Beautifully curled, and when well developed resembles a tuft of moss; the most ornamental of all	.05	.20	2.00
Broad-Leaved Batavian. Leaves very broad; color light green, requires to be tied up for blanching; used principally in soups	.05	.20	2.00

KALE. (See BORECOLE,)

KOHL-RABI.

One ounce will sow 200 feet of drill.

This vegetable, the popularity of which is rapidly increasing, combines the virtues of the turnip and cabbage, but excels both in nutritive, hardy and productive qualities. The seed may be sown in June in rows eighteen inches apart, and the plants thinned out to eight or ten inches.

White Vienna. The earliest and best table or market variety. Pkt. 5cts. Oz. 25cts. Lb. \$2.00.

Purple Vienna. Similar to the preceding, except in color, which is of a bluish purple. Pkt. 5 cts. Oz. 25 cts. Lb. \$2.00.

LEEK. (Lauch.)

One ounce will sow 100 feet of drill.

The Leek is very hardy, and easily cultivated; it succeeds best in a light, but well-enriched soil. Sow as early in Spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high, transplant in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

American Flag. The most desirable for market or family use. Pkt. 5 cts. Oz. 20 cts.

Lb. \$2.00.

Musselburgh. A very large variety of superior quality. Pkt. 5 cts. Oz. 20 cts.

LETTUCE. (Lattich Salat.)
One ounce will produce about 3000 plants.

Lb. \$2.00.

Lettuce succeeds best in rich and comparatively moist soil, and is most crisp and tender if grown in cool, moist weather. The more rapidly the plants are grown, the more tender and brittle will be their quality. For early use, sow under glass, in February or March, and transplant into a previously prepared hot-bed; rows at least twelve inches apart, according to the varieties. Sowings may be made in the open ground as soon as all danger from frost is over; and if a continuous supply is desired during the season, make sowings every two or three weeks, until September.

MARTYNIA. (Gemsenhorn.) One Ounce will plant 100 hills.

A strong growing annual plant bearing curiously shaped seed pods, which, when young and tender, make excellent pickles. Sow in the open ground in May, and thin out the plants to two or three feet apart, or a few seeds may be sown in a hot-bed Pkt. and afterwards transplanted. .05 .30 3.00

Proboscidea

MUSK MELON. (Melone.)

One ounce will plant 60 hills, two to three pounds for an acre.

Cultivate in hills, which should be five to six feet apart each way, and composed of light, moderately rich soil. The hills should be dug about two feet square, eighteen inches deep, and half filled with wellrotted manure, which must be thoroughly incorporated with the soil. Plant in May, ten seeds to the hill, and when the plants are well up, thin out to three. Cultivate until the vines cover the ground, and pinch the ends of the growing shoots to induce early fruiting.

MUSHROOM. (Champignon.)

One pound of spawn is sufficient for nine square feet of bed.

If wanted by mail, add 10 cents per lb. for postage.

Mushrooms are more easily cultivated than many people imagine, and may be grown in any dark room or cellar where the temperature can be maintained at from fifty to sixty-five degrees. For the bed, use a mixture of horse droppings and good fresh loam in equal proportions. Before being placed in the bed let this material be thoroughly mixed, and well turned three or four times to sweeten in some dry place. Upon a dry, firm bottom, proceed to make the bed, by spreading a thin layer of the prepared mixture and pound it firm till the bed is eight inches thick. Leave it thus for about a week, or till the temperature of the bed has subsided to ninety or ninety five degrees. Then make holes about ten inches apart, and put in each a piece of spawn about the size

of an egg. Cover the holes and press the soil solid and smooth. Let the bed remain in this condition ten days. Then cover with two inches of fresh loam. Over this place a few inches of straw. If the temperature is right, mushrooms will appear in six to eight weeks from time of spawning. The bed will continue bearing about a month. After the first crop is gathered, spread over the bed an inch of fresh loam, and moisten with warm water. In the event of the surface of the bed getting very dry at any time, it should be moistened freely with water at a temperature of eighty to eighty-five degrees.

Our Celebrated English Milltrack Mushroom Spawn. Made by the best maker in England especially for our trade. Lb. 12 cts. 50 lbs. \$5.00. 100 lbs. \$9.00. American Pure Culture. Single bricks 25 cts. each. \$15.00 per 100.

MUSTARD. (Senf.)

One ounce will sow 50 feet of drill.

As an ingredient, the green Mustard imparts a delightfully pungent flavor to the various forms of prepared salads. For early crops the seed may be sown in a hot-bed in March, and for general crop at frequent intervals through the spring, in drills from eight to twelve inches apart.

White. The best variety for salads; the seed is also used medicinally, and as a seasoning for pickles. Pkt. 5 cts. ½ lb. 10 cts. Lb. 25 cts.
Brown. An esteemed sort for culinary use. Pkt. 5 cts. ½ lb. 10 cts. Lb. 25 cts.

Brown. An esteemed sort for culinary use. Pkt. 5 cts. ½ lb. 10 cts. Lb. 25 cts.

New Chinese. Leaves twice the size of the white mustard; stems more succulent, of deeper green; flavor pleasantly sweet and pungent. Pkt. 5 cts. Oz. 15 cas.

Lb. \$1.00.

NASTURTIUM or INDIAN CRESS.

One ounce will sow 20 feet of drill.

The Nasturtium is both ornamental and useful, the tall variety forming a showy and graceful climber, and the dwarf an exceedingly beautiful and attractive border flower, while the young seeds of either, when pickled, furnish an excellent substitute take capers. Sow the seeds in drills one inch deep; the tall should be grown by the side of a fence or supported by a trellis.

		Pkt	Oz. Lb.
Tall. Excellent for covering fences or trellis-work, .		05	.15 \$1.00

OKRA or GUMBO. (Essbarren.) One ounce will sow 40 feet of drill.

This plant is extensively cultivated for its green pods, which are used in soups and stews, and are very wholesome and nutritious. Sow about the middle of May, in drills three feet apart, and thin out the plants to one foot apart.

		Pkt.	Oz.	Lb.
Improved Dwar	f Green. Very early; smooth pods,	05	.10	.75
White Velvet.	Pods smooth, of large size, and a creamy white,	.05	.10	.7ŏ

ONION. (Zwiebel.)

One ounce will sow 100 feet of drill. Four or five pounds to the acre.

The onion thrives best in a light, loamy, mellow, soil; and unlike most kinds of garden vegetables succeeds well when cultivated on the same land for successive years. The seed should be sown as early in the Spring as the ground is in good working condition, in drills fourteen inches apart, and covered one-half inch deep. When the plants are three inches high, thin to two inches apart. Keep free from weeds, but be careful not to disturb the growing bulbs. A top dressing of wood ashes, applied after the second weeding, is very beneficial to this crop, as will soon be observed by the dark and healthy change of color given to the plants. The onions will ripen early in September, and after being gathered and exposed to the sun a few days for drying they will be ready for storing or the market,

PARSLEY. (Petersilie.)

One ounce will sow 150 feet of drill.

Parsley succeeds best in rich, mellow soil, and as the seed vegetates slowly—sometimes remaining in the earth four or five weeks before the plants appear—the sowing should be made as early in spring as the ground is in working condition. When the plants are two or three inches high thin them out to eight or ten inches apart, being careful in the thinning to leave only the best curled plants. The leaves of the curled varieties afford one of the most beautiful of garnishes; they are also used for flavoring soups and stews.

PARSNIP. (Pastinake.)

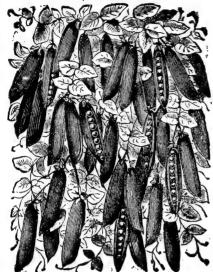

One ounce will sow 100 feet of drill. Five to six pounds to the acre.,

Sow in April or early in May, as parsnips require a long season to mature. Their cultivation is otherwise the same as directed for carrots. They may be dug in the autumn and stored for winter use, but if left in the ground till the following spring they are very much improved in flavor. Sow a liberal quantity of seed, as from its nature it does not always come up well.

PEAS. (Erbse.)

One quart will sow 100 feet of drill; one and one-half bushels per acre.

GREY'S PERFECTION.

The Pea comes earliest to maturity in light, rich soil. Sow as early as the weather will permit, in drills two to three and one-half feet apart, and cover three inches deep. Forgeneral crops a good dressing should be applied, and for the dwarfgrowing kinds the soil can hardly be made too rich. For a continuous supply during the season, sowings should be made from early in April until the middle of June; planting should then be discontinued until the middle of July, when a good crop may sometimes be secured by sowing an extra early sort. The crop should be gathered as it becomes fit for use.

All wrinkled Peas are superior to, more delicate in flavor, and remain longer in season than the smooth sorts, but should not be sown until the ground becomes warm, for, as in sugar corn, the wrinkled appearance indicates the greater amount

of saccharine matter. We contract annually with growers of reliability and experience, who raise our supplies from the finest and most carefully selected seed stocks in the country. We cordially invite growers for market and all others to call and examine ours when in need of true, pure and fresh seed Peas.

Ruby King Long about five inches: very thick; fine, mild flavor,	.05	.25
Squash. Flesh thick, mild, and pleasant to the taste, though more		
niquant than some.	.05	.30
Sweet Mountain. Grows to large size; shape somewhat like the Bell,		

POTATOES. (Kartoffel.)

Eight to ten bushels will plant one acre.

A good, sandy loam produces the best potatoes, but tney can be grown on all kinds of soil. New or pasture land, with the turf freshly turned, produces the finest crop. Make furrows of good depth, three feet apart. Scatter a liberal dressing of phosphate or decayed stable manure along the drill, and set the seed about ten inches apart in the rows. Cover with about two inches of soil, and begin to cultivate when the plants are well up. At each successive hoeing, bring additional soil about the plants.

but much larger; much used for pickling,

The necessity of changing Potato Seed is universally admitted by all well posted growers. By using our Northern Grown Seed you are assured of early maturity, increased yield and a vigorous growth.

Beauty of Hebron. A very productive variety of fine quality; good either as an early or general crop potato.

Clark's No 1. Similar to Early Rose but more productive, slightly larger and more mealy. A first class potato in every respect.

Early Ohio. One of the earliest; tubers almost round and very solid; good either

for table or market purposes.

Early Rose. The well known variety; early and prolific. Our stock is of the desir-

able "Houlton Rose" seed. New Queen. Flesh white and quality unsurpassed; Early and productive. In shape and color it resembles the Beauty of Hebron.

Green Mountain. We can recommend this variety as one of the best for all purposes.

LOWEST MARKET PRICES. Write for Quotations.

POTATOES—Continued.

Irish Cobbler. Extra early, producing plump, handsome tubers.

Carman No 3. The handsomest large White Potato; heavy yielder of excellent quality.

Bliss' Triumph, a well known early sort, of superior quality and excellent flavor.

LOWEST MARKET PRICES. Write for Quotations.

PUMPKIN. (Curbis.)

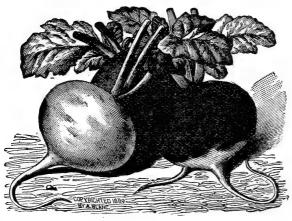

One ounce will plant 20 hills. One pound 250 hills.

Sow in good soil in May, when the ground has become warm, in hills eight or ten feet apart each way; or in fields of corn, about every fourth hill. The pumpkin is not so particular in regard to soil as the melon or cucumber, but in other respects is cultivated in a similar manner, though on a larger scale. If planted in hills by themselves, thin out the plants when beginning to run, to three in each hill.

fine table variety, \cdot	.05	.10	.00

RADISH. (Rettig.)

One ounce will sow 100 feet of drill.

For early use sow in the hot-bed in February or March and in the open ground as soon as it can be worked. Sow in rich, mellow soil, in drills about fourteen inches apart, and thin out the plants to three inches apart in the drills. For a continuous supply during the season, make sowings every two weeks, as the early sown plants become rank and unfit for use as they increase in size. Radishes to be crisp and tender, must be grown quickly and be frequently watered if the weather is dry.

Round Black Spanish. Skin black; roots globe shaped; white fleshed and piquant flavor	.05	.10	.75

RHUBARB. (Rhabarber.)

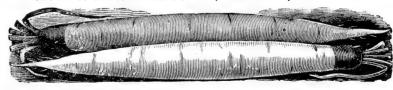

One ounce will produce about 750 plants.

Rhubarb succeeds best in deep, rich loam; the richer its condition, and the deeper it is stirred, the better, as it is scarcely possible to cultivate too deeply or to manure too highly. It is propagated by seeds, or by division of the roots—the latter being the usual method. Sow the seed in drills eighteen inches apart, and thin out the plants to nine inches apart in the drills. When the plants are one year old transplant into beds, setting the plants five feet apart each way. Do not cut until the second year and give a liberal dressing of manure every Fall.

Lineary Mr. and interest for any decrease and	FKt.	Oz.	110.

SALSIFY or OYSTER PLANT. (Haferwurzel.)

One ounce will sow 50 feet of drill, about seven pounds an acre-

A very delicate and nutritious esculent, especially esteemed for its peculiar oyster flavor. Sow the seed early in spring, in drills twelve inches apart and one inchedeep, thinning out the young plant to six inches. The roots will be ready for use in October, when a supply should be taken up and stored like carrots. Those remaining will suffer no injury by being left in the ground till spring.

Mammoth Sandwich Island. Tender and delicious, very superior. Pkt. 5 cts. Oz. 15 cts. Lb. 1.50.

Long White French. Pkt. 5 cts. Oz. 15 cts. Lb. 1.25.

SPINACH. (Spinat.)

One ounce will sow 50 feet of drill. Twelve pounds will sow an acre.

Spinach may be grown on any ordinary soil. It is grown both as a spring and summer crop. For early use, sow in August or September, in drills twelve to fourteen inches apart. At the approach of cold weather cover lightly with straw, or any handy litter. Uncover when the plants begin to make a new growth in spring. For summer use, sow early in spring, in same way as above, using rather less seed. If the plants stand too thick, thin to three or four inches apart. A liberal dressing of good ma-

nure should be used. The land can hardly be made to rich.

SQUASH. (Speise Kurbiss.)

One ounce of the small seeded variety will plant 40 hills; of large seeded, 15 hills.

The squash is one of the most nutritious and valuable of all our garden vegetables. The Summer varieties come to the table early in the season, and are very palatable, while the Winter sorts can be had in perfection from August until the Summer varieties are again in condition. The young plants are very tender and sensitive to cold, and planting should be delayed until the ground is dry and warm. Plant in well-matured hills, in the

SUMMER CROOKNECK.

same manner as cucumbers and melons, the bush varieties three or four feet apart each way, and the running kinds from six to eight feet apart. Sow eight or ten seeds to a hill, thinning out, after they have attained their rough leaves, and danger from bugs is past, leaving two or three of the strongest plants in each hill.

sweet, and of fine flavor .

TOMATO. (Liebesapfel.) One ounce will produce 1,500 plants.

CRIMSON CUSHION.

This delicious vegetable is one of the most important of all garden products. The seed should be sown in a hot-bed about the first week in March, in drills five inches apart, and half an inch deep. When the plants are about two inches high, they should be set out four or five inches apart in another hot-bed, or removed into small pots, allowing a single plant to a pot. About the middle of May the plants may be set out in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shovelful of rotted manure should be mixed. On heavy soil, which is not suited for an early crop, they should be planted four feet apart. freely at the time of transplanting, and shelter from the sun for a few

.10 1.25

days until the plants are established. Sufficient plants for a small garden may be started by sowing a few seeds in a shallow box or flower pot, and placing it in a sunny window of the room or kitchen.

10 cents per packet.

TURNIP. (Rube.)

One ounce will sow 150 feet of drill. One and one-half pounds per acre.

Turnips do best in highly enriched, light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for Fall and Winter use. Swedish or ruta-baga turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the last of July, in drills two to three feet apart, and the plants when well up should be thinned to ten inches apart. They are best preserved in a pit or cellar during the Winter, and are excellent for the table early in Spring.

POT, SWEET, AND MEDICINAL HERBS.

No garden is complete without a few herbs for culinary or medicinal purposes; they are easily grown, and when preserved by drying, are ready for use at any season of the year. Plant in Spring, when the ground is warm, in drills, covering lightly. When the plants are well up, thin out or transplant to about four inches apart. They should be harvested on a dry day just before the blossom develops, dried quickly and bottled, or closely packed in dry boxes with the air entirely excluded.

Early Amber Sugar-Cane. When carefully cultivated, large yields of seed and syrup can be obtained. One of our best green fodder plants. Sow in drills at the rate of seven or eight pounds per acre. Lb., 15c.; 100 lbs., \$8.00.

DWARF ESSEX RAPE.

This is very valuable for sheep pasture. It can be sown in May, and will be ready for pasturing in July or August; or it may be sown in June, or even up to the latter part of July, and yet furnish, under reasonably favorable circumstances, a large amount of pasture and fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about six pounds to the acre; broadcast, ten pounds to the acre. Lb., 15c.; 100 lbs., \$8.00.

BOSTON LAWN GRASS.

Boston Lawn Grass is composed of the very best varieties of grass, such as long experience has shown to be the best adapted to produce a thick, heavy, carpet-like lawn. In this mixture we use only the very best recleaned seed, and can guarantee that for purity and germination it is equal to any variety sold under any name.

Our customers can rely in buying Boston LAWN GRASS SEED on its being the very purest seed obtainable, and entirely free from weeds or foreign seeds. Qt., 20 cts.;

4 qts., 60 cts.; peck, \$1.00; bushel, \$4.00.

GREY'S SPECIAL RECLEANED LAWN GRASS.

The grasses used in this mixture are the purest that can possibly be procured and are entirely free from weeds or chaft. We have supplied this to the leading Golf Clubs and Parks, and it has always given satisfaction. There is nothing better. Sow 60 lbs. to the acre. Sold by weight, a measured bushel weighs 32 lbs. Per lb. 30 cts.; 5 lbs., \$1.40; 10 lbs., \$2.75; 100 lbs., \$25.00.

Special Mixtures for Putting Greens and Fair Greens.
Prices on application.

GRASS SEEDS.

Prices subject to market fluctuations.

We make a specialty of Grass Seeds, and send out only the most useful varieties which are adapted to this country. All that we offer have been recleaned and will meet the views of the most critical buyers. Our prices are as low as the quality of seed we offer can be sold at, and should not be compared with the low prices quoted for inferior grades. We shall always be pleased to mail samples for comparison.

Timothy. (Phleum pratense.) One of the most important of the grasses, Lb. 100 Lbs. thriving best upon rich, heavy soils, where it remains permanent and produces heavy crops. Sow 25 lbs. to the acre when sown alone ...10 6.00

Red Top. (Agrostis vulgaris.) A valuable native permanent grass, growing in almost any soil, moist or dry, and standing our hot climate.

GRASS SEEDS Continued.	* 1.	400 FB
Rhode Island Bent. (Agrostis canina.) A fine, hardy, very compact grass; very permanent, readily forming a heavy sward; excellent for pastures. Sow 4 bushels per acre, if alone. (10 lbs. per bushel)	дь. .25	100 Lbs. 22.50
Kentucky Blue. (Poa pratensis.) Also called "June grass;" an early grass of much value; will do well upon any ordinary soil; stands the heat of summer remarkably well. For pastures and lawns it has no superior, giving that peculiar, rich shade of bluish-green so much admired in the best lawns; also making a very close, velvety turf. It is usually sown mixed with other fine grasses; when used alone, 30 to 40 lbs. per acre. Blossoms in June. Fancy clean seed.	.20	18.00
Fowl Meadow. (Poa serotina.) A valuable grass for wet meadows, where it will produce large crops of excellent hay after it has become well established. It thrives on such lands as are occasionally overflowed, but will not endure to remain under water for a long period, especially in hot weather. Blossoms in July or August. Sow 20 lbs. per acre.	.25	20.00
Sweet Vernal, True Perennial. (Anthoxanthum odoratum.) Useful to mix with other grasses for lawns, in which it is invaluable on account of its early growth and the fragrant odor which it imparts to the other grasses when drying; very hardy and permanent	.65	60.00
Crested Dogstail. (Cynosurus cristatus) Good for permanent pasture for sheep, is productive and early, suffers but little from dry weather, and is one of the best grasses for lawns; thirty-five pounds to the acre	.35	30.00
Hard Fescue. (Festuca duriuscula.) Admirable pasture grass of fine quality; thrives well in dry situations; thirty pounds to the acre	.15	12.00
Meadow Fescue. (Festuca pratensis.) This is excellent for hay when sown with other grasses, such as Orchard Grass and Timothy, and is also considered one of the best grasses for permanent pasture on a great variety of soils; sow forty pounds per acre	.15	12.00
Italian Rye Grass. (Lolium Italicum.) Thrives in any soil, yields an early and abundant crop, valuable for mixing with other pasture grasses; sow fifty pounds per acre	.1:	
Perennial Rye Grass. (Lolium Perenne.) A nutritious permanent grass for meadows and pastures, or for mixing with other grasses for lawns; does well on all soils; sow fifty pounds per acre		
Tleadow Foxtail. (Alopecurus pratensis.) One of the best and earliest of pasture grasses; thrives best in moist localities; thirty pounds to the acre	.30	
Rough-Stalked Meadow Grass. (Poa trivialis.) Produces an abundant crop of highly nutritious herbage, valuable for either moist or dry soils; thirty pounds to the acre	.40	35.90
Sheep's Fescue. (Festuca ovina.) Is excellent for pasturage for sheep; is short and dense in its growth, making it valuable also for grass plots. Thirty pounds will sow an acre	.20	15.00
Tall Fescue. (Festuca elatior.) Excellent for permanent pastures on moist soils, on which it yields immensely. Sow forty pounds per acre	.25	20.00

ORCHARD GRASS.

GRASS SEEDS—Continued.

Orchard. (Dactylis glomerata.) One of the earliest grasses; yields immense crops and is excellent for pa-ture or hay; should be cut as it is coming into bloom, and will produce a heavy second crop; one of the best grasses. Sow forty pounds per acre. Lb., 20c. 100 lbs., \$15.00.

Tail Meadow Oat Grass. (Avena elatior.) This grass produces an abundant supply of foliage, and is valuable for pasture on account of its early and luxuriant growth. It shoots up very quickly after being cut, and produces a thick growth of aftermath, which also makes it valuable as a soiling crop. Forty-five pounds sow an acre. Lb., 25c.; 100 lbs., \$20.00.

CLOVER SEEDS.

There are no plants so valuable for fertilizers as the clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay, add immensely to the fertility of the

and by their decay, and immensely to the ler	unicy	or the
soil. The seed may be sown in Fall or Spring; the best results will come if	\mathbf{rom}	sowing
in the Spring, and it is often sown on the late snows of April.	Lb.	100 Lbs.
Red Clover, Medium. (Trifolium Pratense.) The leading variety of clover for pastures or meadows. Sow in Spring or fall	.20	15.00
Red Northern, or Mammoth. Grows four to five feet high, and is used		
by some to plow under for manure	.20	16 00
Alfalfa, or Lucerne Clover. (Medicago sativa). Early, productive and lasting a number of years. Succeeds in good, deep soil.	.20	18.00
Alsike, or Swedish. (Trifolium Hybridum.) Hardiest of all the clovers		
and on rich moist soil yields an enormous quantity of hay or pasturage. Valuable for sowing with clovers or grasses, as it forms		
a thick bottom and increases yield of hay	.20	16.00
Crimson Clover. (Trifolium incornatum.) An annual variety, largely		
used in the south for feeding green and for hay. The yield in fodder is immense, and after cutting it at once commences growing		
again and continues until cut by frost. Sow in April or May;	10	0.00
ten to fifteen pounds to the acre	.10	8.00
White Dutch Clover. (Trifolium Repens.) The best variety for lawns,		
as it forms a close herbage and remains green throughout the season; it is also valuable when mixed with grass seeds for pasture.	.30	25.00

MILLETS.

Millets should be sown in June and July, and are Annual forage plants of thick growth, valuable for green fodder or hay, maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay.

German, or Golden. (Southern grown.) A valuable annual hay and fodder crop, more productive and coarser than the Hungarian grass; medium, early, four to five feet high. Sow one bushel to the acre. Bushel, \$1.75.

Common Millet. (Panicum Miliaccum.) Very early, two to three feet high, foliage broad, heads open, branching panicles. Bushel, \$1.50.

Japanese. (Panicum crus Galli.) Grows taller and stools out more freely than the Common Millet; very productive. If sown early and cut, usually produces a good second crop. It has produced in Massachusetts, six tons dry hay per acre; highly recommended. Sow twelve quarts per acre. Lb., 10 cts; bushel, \$2.50.

Hungarian Millet. (Panicum Germanicum.) An annual forage plant, early and productive, growing two to three feet high with an abundance of foliage, often yielding two to three tons per acre. Sow one bushel to the acre. Bushel, \$1.50.

CHOICE FLOWER SEEDS.

In the following pages we describe, arranged alphabetically, the leading Flower Seeds, including many New and Special flowers of unusual beauty. These Seeds are all of the fines, strains of the best varieties and are sure to give entire satisfaction. They are grown by flower seed specialists in America, England, Germany and France.

Inducements to Cash Buyers. On all orders for seeds in packets, accompanied by the money, purchasers may select twenty-five cents' worth extra for each dollar sent. Thus, any one sending us one dollar may select seeds in packets amounting to one dollar and twenty-five cents. For two dollars seeds in packets amounting to two dollars and fifty cents, and so on.

This offer does not include seeds by weight or measure, Bulbs or plants.

We mail free all Flower Seeds at packet and ounce prices.

When ordering write the numbers only, not the names. 1. ADENOPHORA Potanini. Hardy perennial with numerous large .25 like clusters of sweet-scented flowers; height, eight inches Lemon-yellow: wax-like Arenaria. Arenaria. Lemon-yellow: wax-like

266.	Elegans Alba. Single white
267.	" Purple King. Purple, fine, double
268.	" Salmon Queen. Double, beautiful pink
269.	
	CLEMATIS. Rapid-growing climbers, fine for arbors and verandas; the small
	varieties flower in clusters, and are very fragrant; the large-flowering varieties
	are very handsome. Soak the seeds in warm water for 24 hours before sowing; hardy perennials.
270.	Jackman's New Hybrids. Large flowering, mixed, magnificent varieties
271.	Paniculata Covered with pure white, fragrant flowers, completely hiding the foli-
	age. In Sept. the flowers are followed by seed pods of bronzy red; perfectly hardy.
272.	CLIANTHUS DAMPIERI (Glory Pea.) One of the most beautiful plants, with neat.
	compound leaves, and drooping clusters of large, rich-scarlet, pea-shaped flowers,
	marked with a large, black blotch in front; tender perennial. 4 ft
	274. COBEA SCANDENS. A climber of rapid growth, with large, pur
	ple, bell shaped flowers, valuable for covering trellises, arbors trunks of trees, etc.; will cling to any rough surface. In sow
200	ing, place seeds edgewise and merely cover with light soil
ETIL	Oz., 75c. Pkt., 10c. Alba, 10c.
	275. COCCINCA INDICA. Fine annual climber, with white flowers and
	scarlet fruit. 8 ft. Pkt., 5c.
Con	COLLUS. One of the most popular ornamental foliage plants. It
24	is very decorative in the flower border, and easily grown from
6 4	seed, from which many new varieties are produced. Hali
1/ sal	hardy perennial. 276. Fringed and Blotched. Large leaves, fringed and blotched in
V	beautiful colors. Pkt., 20c.
1	277. Large Leaved Varieties. Saved from new varieties, with very
STATE OF THE PARTY	large and superbly variegated foliage. Pkt., 20c.
	278. Finest Mixed Hybrids. From a large collection of the finest and
S. S. A.	showiest Hybrids. Pkt., 10c.
and the same	279. COLLINSIA. Finest Mixed. Free flowering, remarkably attract
	ive for beds and borders; hardy annual. Pkt., 5c. 280. COMMELINA COELESTIS. Rich sky blue. Tuberous rooted, free
Fik	blooming, very pretty plant. Half hardy perennial, blooming
C	oleus, large leaved. the first season from seed; succeeds in light, rich soil. 11/ft. 5c
0	281. CONVOLVULUS MINOR. Finest Mixed. (Dwarf Morning
	Glory.) Remarkably showy plants, with handsome, rich-colored flowers, producing in beds of
•••	borders; brilliant effect; hardy annual. Oz., 25c. Pkt., 5c.
282.	Mauritanicus. Beautiful for baskets and vases; flowers blue; hardy perennial. Pkt., 10c.
	COSMOS. A magnificent race of plants which attain a height of nearly five feet, and which in the fall months are literally covered with flowers, which closely resemble single dahlias.
283.	Large Flowered Perfection. Pink. Oz., 50c. Pkt., 5c.
284.	Large Flowered Perfection. White. Oz., 50c. Pkt., 5c.
285.	Giant Early Flowering. Finest Mixed. Superb mixture in every shade, from pure white
	to crimson, and ingreat variety of forms. Immense flowers, four to five inches in diameter
201	Oz., \$1.25. Pkt., 10c.
286.	Giant Early Flowering. Pink. Pkt., 10c.
287.	Giant Early Flowering. White. A superior strain.
	Seed grown in New England. Pkt., 10c.
	CYCLAMEN GIGANTEUM GRANDIFLORUM. Charm-

ing plants with beautiful foliage and rich-colored fragrant flowers, universal favorites for winter and spring blooming. The Giganteum varieties have large leaves and stout flower stalks, throwing the flowers well above the foliage.

289. Crimson King. Very large, brilliant color. Pkt., 50c.

Duke of Connaught. Rich purplish crimson, of large 290. size. Pkt., 50c.

291. Excelsior. White, red base; fine. Pkt., 50c.

292. Mont Blanc. Pure white; extra fine. Pkt., 50c.

293. Picturatum. White and pink. Pkt., 50c.

Princess May. Bright pink, beautiful large flowers. 50c. 294.

Prince of Wales. Large, brilliant red, fine form and 295. substance. Pkt., 50c.

Princess of Wales. Deep pink. Pkt., 50c. 296.

Brilliant, Deep red. Pkt., 50c. 297.

Duke of Fife. Deep rose. Pkt., 50c. 298.

Salmon Queen. Delicate salmon pink. This is a new color in Cyclamen and has proved very 299. popular. We recommend this variety. Pkt., 50c.

Finest Mixed. Mixed from named varieties only. Pkt., 50c. 300.

CYCLAMEN GIGANTEUM.

PRIMULA CHINENSIS.

PRIMULA CHINENSIS. Chinese Primrose.
This charming and beautiful flowering plant is indispensable for winter or spring decorations in the home or conservatory. It is one of our most important winter blooming pot plants. The seed we offer is of the highest merit and has, as usual, been saved from the best strains of English and Continental growth. The flowers are large, of great substance, and of the most beautiful colors and shades. The seed may be sown in spring or autumn. Transplant singly when large enough; re-pot as the young plants grow, in a compost of sandy loam, peat and loam, peat and rotted cow manure.

674. Alba Magnifica. The finest pure white with bright yellow eye, beautifully fringed. Pkt., 50c.
Blue. Very fine shade; strikingly beautiful; desirable pot plant. Pkt. 50c.
Chiswick Red. Large brilliant searlet, finely fringed. Pkt., 50c.
Blue Bright pink beautifully fringed.

677. Pink. Bright pink, beautifully fringed.

678. Finest flixed. A splendid, large flowering, fringed strain, containing the new and most distinct varieties and colors. Pkt., 50c 679. Giant White. A super

and colors. Pkt., 50c.

679. Giant White. A superb variety, with enormous flowers. The flowers pure snow-white, with yellow eye; the petals broad, thick and beautifully fringed, of remarkably vigorous growth. 1 kt., 50c.

680. Giant Rose. Elegant in habit, with a strong flower stalk rising clear above the foliage. The foliage is of

1

	above the foliage. The foliage	is of
	good substance, while the beautiful flowers, a light rose color, are of enormous size.	
No.	Pkt., 50c.	Pkt.
681.	Giant Flowering. Fine Mixed. Vigorous growth, producing very large individual flowers	
	of great substance, on stout stems, carried well above the foliage; superb mixture.	-50
682.	Double Fringed. Finest Mixed. Large flowering; saved from new and distinct varieties;	-00
	extra fine	.50
683.	Primula Stellata. (Star Primula.) White flaked crimson. A distinct race, differing in	
	habit and appearance from the ordinary Primula, the star-like blossoms being grace-	
	fully poised on slender footstalks in tiers. Sow in pans in May, June or July, in a	
	light, rich soil, covering the seeds very slightly; place them in a moist heat, taking care	
	to water only moderately. 2 ft	-50
684.	Obconica Grandiflora Hybrida. Improved, large flowered, varying in color from white	
	to bright rose and violet; a splendid pot plant	.25
585.	Obconica Grandiflora Fimbriata. Very large flowers, with nicely fringed and toothed	
	petals. The flowers are produced in constant succession, ranging in color from white	
	to rose; a beautiful pot plant. Awarded Silver Medal by Mass. Horticultural Society.	.20.
686.	Forbesi. Very free flowering, beautiful rosy lilac flowers. Fine for pots and bouquets.	
	Seedlings begin to bloom three months after being sown	.25
	DDIMIU A HALC HADDY, DDIMBOCC The following vanieties and delighted to a series	

PRITIULA, HALF-HARDY; PRITIROSE. The following varieties are delightful for early flowers under glass, or in the open air, with protection during winter.

Lucaulis Blue. (Hardy Primrose.) The flowers are freely produced on single stalks, rising 687. Aucaulis Blue. (Hardy Primrose.) The flowers are freely produced on si well above the foliage, varying in color from lavender to deep blue. Saved from the brightest and richest shades only

BULBS, ROOTS AND TUBERS.

FOR SUMMER AND AUTUMN-FLOWERING.

Of the easiest possible culture, and rapidly increasing in popularity; sure to grow and produce abundance of bloom in a great variety of forms and richest colors. The bulbs may be lifted in the autumn as soon as ripe and kept for the next season's planting.

ACHIMENES.

Remarkably showy, free-blooming plants of easy cultivation. Pot the small bulbs early, in a mixture of loam and leaf mould. Keep rather warm, and water with care. After flowering, dry off in the same pots, and keep the bulbs dry and warm during winter.

Mixed Varieties. Very fine colors . .

. . . . Each 10c., Doz. \$1.00

60

AMARYLLIS.

Beautiful Lily-like plants, remaining a long while in flower. Admirably suited for culture in pots and tubs. They thrive best in a soil composed of loam, leaf-mould and sand.

Formosissima. (Jacobean Lily.) Handsomelyformed flowers of velvety crimson color. If planted out of doors will bloom freely quite early. . . Each, 15c; doz. 1.75 Johnsoni. Very large crimson and white flowers.

Vallota Purpurea (Scarborough Lily.) Rich oright scarlet, flower in a cluster, blooming in summer and

BEGONIA, TUBEROUS-ROOTED.

For bedding and as pot-plants, these beautiful flowers are very desirable and popular. They bloom continuously all summer flowers very large, and outrivaling those of the most brilliant Geraniums. They can be grown successfully by any amateur. In habit this fine strain is dwarf, with strong, erect flower-stems, carrying the blossoms above the foliage. The flowers are circular, large and of great substance; the colors are most beautiful, rich and varied. At the low prices we quote, this superb flower is brought within the means of all for liberal planting.

CALADIUM ESCULENTUM. (Elephants' Ear.)

CALADIUM ESCULENTUM.

Very ornamental, with immense smooth, light green leaves, beautifully veined with dark green. One of the most effective plants in cultivation for the flowerborder or lawn; will grow in any good garden soil, and is of easiest culture. To obtain the best results, should be planted where it will obtain plenty of water, and in an abundance of rich compost. Mons er Bulbs. . .35 **\$3**.50 .20

DWARF FRENCH CANNAS.

These Dwarf French Cannas have become very popular of late, and justly so. Their fine and brilliant colors, large flowers, graceful and ornamental foliage, and dwarf habit of growth, render them exceedingly valuable for decoration. Keep the roots in a warm dry place through the winter.

Alphonso Bouvier. Vivid crimson scarlet flowers, very large; 6 ft. Alsace. Sulphur yellow changing to creamy white without spots; vigorous grower, green foliage; 4 ft. .

Ami Pichon. Magnificent deep crimson, large trusses of flowers; 5 ft. Austria. Large canary yellow flowers, spotted with brownish red; 6 ft. Burbank. Rich canary yellow, lower petals spotted crimson; 6 ft. Captain P. de Suzzoni. Deep yellow lightly spotted with red; 6 ft. . Charles Henderson. Bright vermillion red, pencilled with yellow in the

centre; compact, dwarf with very large flowers; 31/2 ft. Chicago. Vermillion, the large flowers open out nearly flat; broad green foliage; 4 ft. Columbia. Bright crimson, with very deep orange crimson markings;

green foliage; 3 ft. Egandale. A fine dark foliaged variety, with flowers currant red; very

distinct and striking appearance; 4 ft.

Flamingo. Glowing crimson, flowers large, gracefully reflexed and of fine form; dark green foliage; 4 ft.

Florence Vaughan. Rich golden yellow spotted bright red; 4 ft. . Geotfrey St. Hilliare. Large flowers of a rich scarlet overlaid with orange, bronzy purple foliage; 4½ ft.

Brilliant scarlet, spotted and deeply bordered with yellow; foliage deep green; 6 ft. J. D. Cabos. Rich orange tinged apricot, purplish green foliage; 4½ ft.

Madame Crozy. Dazzling crimson scarlet, bordered with golden yellow; foliage bright green; 4ft. Paul Marquant. Bright salmon scarlet, passing to a rosy carmine with

a peculiar silvery lustre; large and distinct flowers; 3½ ft. Rose Unique. Beautiful rose color, vigorous but dwarf growth; 31/2 ft. Queen Charlotte. Rich scarlet, with a wide, bright gold band around each petal; large flowers, green foliage; 3 ft.

Souvenir Antoine Crozy. Intense scarlet crimson, with a broad, rich golden yellow edge, and does not fade or scorch in the hot and dry weather. Flowers very large, of great substance, opening flat; 3 ft. Mixed Sorts. Fine varieties

·.15 \$1.50

GLOXINIA, LARGE FLOWERING

GLOXINIA.

Magnificent for house culture, producing in great profusion beautiful flowers of the richest and most beautiful colors. They succeed best in sandy loam and peat, and require a moist heat. After blooming dry off gradually, let the bulb remain in the pot without water, and keep in a warm place until they show signs of starting again.

Large Flowering Varieties. Separate colors. 15 ets. each; \$1.25 doz.

Large Flowering Varieties. Finest mixed, in many beautiful colors. 15 cts. each; \$1.25 doz.

Heuchera Sanguinea. One of the handsomest hardy perennials of recent introduction. The flowers are of a rich crimson color, the leaves light-green. The graceful flowers on long spikes form splendid material for bouquets. 20 cts. each; \$2.00 doz.

.50 4.00

HYACINTHUS CANDICANS.

A snow-white summer flowering Hyacinth, growing 3 to 5 feet in height, gracefully surmounted with from 20 to 30 pure white bell-shaped flowers. 5 cts. each; 50 cts. doz.

LILIES.

No class of plants can lay so much claim to our attention as the Lilies. They are stately, elegant and beautiful, and possess the most agreeable perfume, and for general effect, whether growing in garden or house, they have no rivals. The soil should be rich, deep and mellow, with good drainage, as nothing will injure the bulbs more than water collecting and standing around them. Do not put manure about the bulbs when setting, as it collects moisture and insects, and often causes the bulbs to decay. Top dressing is the better way to enrich the soil after the bulbs are set. The beds should be well covered with leaves and strawy manure to exclude the frost. Set bulbs 4 to 6 inches deep according to their size.

MADEIRA or MIGNONETTE VINE

A rapid-growing vine, covering a large space in a short time. Fleshy, heart-shaped leaves of a light green, and numerous racemes, of feathery flowers of delicious fragrance. A beautiful and popular vine. 5 cts. each, 40 cts. per doz.

MONTBRETIA CROCOSMIFLORA.

This is one of the most floriferous and showy of summer-flowering plants, and destined to great popularity. Planted 6 inches apart in a group in a sunny position and allowed to remain undisturbed for several years, they form magnificent clumps, producing, in great numbers, graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first season, 20 cts. doz. \$1.00 per 100.

PÆONIES.

We can furnish these well known old favorites in all the newest varieties. Hardy Herbaceous Varieties Named, 50 cts. each.

"Large Roots, various colors, mixed, 25 and 50 cts. each.

Large double crimson, fern like foliage, 50 cts. each.

TIGRIDIA. (Shell Flower.)

Curious and beautiful shell-like flowers about four inches in diameter, flowering from July to October. The bulbs can be planted about the middle of May, and taken up in October and kept over winter in dry sand.

Each Doz.

EXCELSIOR TUBEROSE.

TUBEROSES.

One of the most delightfully fragrant flowers. Invaluable for bouquets, button-holes and wherever cut flowers are in demand. Before potting the bulbs, remove the small offsets. Use good, rich loam, and start in a hot-bed or forcing pit. They should not be set in the garden till June.

Vergennes. Red. bunches and berries large Wilder. Black, large bunches. sweet. Worden. Black, large, excellent quality.

GRAPES, Foreign Varieties. For growing under glass, \$3.50 each.

Black Alicante. Large, fine, late keeping. Black Hamburg. Delicious, best for gen-

Golden Hamburg. White, large, flesh melting.

Gros. Colman. Black, round, splendid late sort.

Muscat of Alexandria. Best white, delicions

RASPBERRIES. \$1.00 per Dozen.

Brinckle's Orange. Large and delicious.

Cuthbert. Rich crimson, berries very large, one of the best. Golden Queen. Large, firm, and of fine quality.

Gregg. Black-cap; large, hardy, and a vigorous grower; great yielder. **Hans-II.** Red, fine, very early and productive.

Marlboro. Red, very large, fine quality.

Souhegan. Black-cap; large, productive and hardy. Turner. Red, medium size, sweet and juicy.

HEDGE PLANTS.

Arbor Vitæ. $1\frac{1}{2}$ to 2 feet, per 100, \$10.00; 2 to $2\frac{1}{2}$ feet, per 100, \$20.00.

Barberry, Common. 1½ to 2 feet, per 100, \$10.00.
"Thunberg's. 18 inches, per 100, \$15.00.

Japanese Quince. 1 to 2 feet, per 100, \$12.00. Hemlock Spruce. 2 to 3 feet, per 100, \$55.00.

Honey Locust. 1 to 2 feet, per 100, \$5.00.

Lilac, Common. Per 100, \$10 00.

Norway Spruce. 1 to 1½ feet, per 100, \$10.00; 1½ to 2 feet, per 100, \$15.00.

Privet, California. 1 to 1½ feet, per 100, \$6.00; 2 to 2½ feet, per 100, 10.00.

Chinese. Ligustrum Ibota. 2 years. 24 to 36 inches, per 100, \$12.00.

FERTILIZERS.

- Clay's Fertilizer. This valuable imported manure is especially recommended to all who grow either fruit, flowers, or vegetables, and wish to bring them to the highest perfection. Should be used in potting soil and spread on staging of greenhouses planted with flowering plants, etc. Per bag of 28 lbs., \$2.25; 56 lbs., \$4.00; 112 lbs., \$7.00.
- Sheep Manure, Pulverized. This is a pure, natural manure, and the most nutritious food for plants. Its effect is immediate, much more lasting and healthy than guano or any other manure. It is the best of all manures for mixing with the soil for greenhouse plants. It makes the richest, safest, and quickest liquid manure, without any deleterious effects.

DIRECTIONS.—For mixing with soil, take one part manure to six parts soil. For making a liquid, take one pound manure to five gallons of water, which can be used with safety daily if necessary. 10 lbs., 50c.; 50 lbs., \$2.00; 100 lbs., \$3.00.

- Our Bone Fertilizers are prepared expressly for our trade; warranted strictly pure.
- Bone Flour. Ground perfectly fine; excellent for pot plants or beds where an immediate effect is wanted. Per 100 lbs., \$3.00; in barrels, about 175 lbs., at 2½c. per lb.
- **Bone Meal.** One of the best Fertilizers to use for general purposes. 10 lbs., 50c.; 25 lbs., \$1.00; 50 lbs., \$1.50; 100 lbs., \$2.50; barrel, about 200 lbs., at 2½c. per lb.
- Bone, Coarse or Cracked. Ground coarse for grape borders or poultry. 100 lbs., \$2.50; barrel, about 175 lbs., at 21/4c. per lb.
- Guano Damaraland. A natural bird guano, equal in every particular to the old-fashioned *Peruvian Guano* of twenty years ago. 100 lbs., \$4.00; ton, \$65.00.
- Complete Lawn Dressing. This is the best lawn dressing in the market. It is composed of finely pulverized blood, bone, potash, and refuse meat. The mixture supplies all the essential food elements requisite for the healthy growth of lawns, and is the cleanest of any to handle.
- Stockbridge Special Manures. These famous and invaluable fertilizers are well known throughout the entire country. The following are the leading kinds, for Potatoes, Corn and Grain, Small Fruits, Vegetables, Root-Crops, Asparagus, Top-Dressing Grass and Seeding-Down Grass. 100-lb. bag, \$2.00; ton, \$38.00.
- Bowker's Hill and Drill Phosphate. A valuable fertilizer which can be used with equal profit for the hill or drill or sown broadcast. It is one of the richest and quickest acting fertilizers, and may be profitably used on any soil. 50-lb. bag, \$1.25; 100-lb. bag, \$1.75; ton, \$34.00.
- Bowker's Lawn and Garden Dressing. A special fertilizer prepared from chemicals, free from weed seeds, almost odorless, clean to handle, and easily applied.

Trial bags for 1,000 sq. ft., \$.50 ,, 2,500 ,, 1.00 | 50-lb. bags for 5,000 sq. ft., \$1.75 - 100-lb. ,, 1/4 acre, 3.00

- Bowker's Greenhouse Dressing. Specially prepared as used by Prof. S. T. Maynard, of the Massachusetts Agricultural College, and containing the chemicals recommended by him in his recent address before the National Florists' Convention. Bag, for 100 plants, one year, \$1.00. Quotations for large quantities on request.
- Unleached Hardwood Ashes. As a fertilizer for lawns, gardens, and fruits Hardwood Ashes are unequaled; they are not a mere stimulant, but supply natural plant food, permanently enriching the soil. Clean, free from offensive odor, and can be applied by any one. They are exceedingly valuable for lawns, imparting a rich, dark shade of green and destroying many of the insects which are so injurious. In barrels, ton, \$18.00; barrel, \$2.50.
- Bradley's Superphosphate. This well-known fertilizer has been a standard fertilizer for years. It quickens the growth of the crop and brings it to earlier maturity. 100 lbs., \$1.75.

- Sulphate of Ammonia. Best grade) 24¾ to 25½ per cent. ammonia. 10 lbs., 600.; 100 lbs., \$4.00.
- Muriate of Potash. 80 to 85 per cent. 10 lbs., 50c.; 100 lbs., \$3.25
- Nitrate of Soda. 95 to 98 per cent. pure. 10 lbs., 50c.; 100 lbs., \$3.25
- Sulphate of Potash. 50 to 55 per cent. sulphate of potash, 35 to 40 per cent. sulphate of magnesia, and not over 2½ per cent. chlorine, excellent for potatoes and small fruits. 10 lbs., 50c.; 100 lbs., \$3.25.
- Land Plaster. For destroying bugs on cucumber, melon, and squash vines. 5 lbs., 15c.; 25 lbs., 50c.; bbl., \$2.00.
- Swift's Lowell Animal Brand. A well-balanced high grade fertilizer for all crops, and popular with market gardeners. It contains double the potash usually found in ordinary fertilizers, and costs no more. 50 lb. bag, \$1.25; 100 lb. bag, \$2.00; ton. \$35.00.
- Swift's Lowell Potato Phosphate. A moderate cost fertilizer for potatoes, used largely in Aroostook County, Maine. Will grow potatoes quickly and will feed the crop during its entire growth. Its potash is in the form of sulphate, which produces the best quality of potatoes. 50 lb. bag, \$1.30; 100 lb. bag, \$2.25; ton. \$37.00.
- ton, \$37.00.

 Swift's Lowell Bone Fertilizer. A quick acting fertilizer for general use in the hill or drill with or without manure. Contains 3 to 4% potash, in addition to ammonia and available phosphoric acid derived from organic matter. 50 lb. bag, \$1.00; 100 lb. bag, \$1.75; ton, \$33.00.

INSECTICIDES.

- Nicoticide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. It may be used with every confidence in houses containing the most tender plants in full bloom, without the least damage to either foliage or flowers, and for this reason it is a great boon to growers of all kinds of tender plants, which are subject to the attacks of aphis. The vapor given off by the compound does not alter the natural color or scent of the flowers. 1 pt., for 32,000 cubic feet, \$2.50; ½ pt., for 16,000 cubic feet, \$1.25; ½ pt., for 8,000 cubic feet, 70 cents.
 - Fumigators for Vaporizing. Stand, pan, and lamp, 50 cents each.
- Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc., contains no ammonia, and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine), 60 cents.
- Bug Death. A patented, non-poisonous powder, entirely different from anything yet offered for the purpose, and as effectual as Paris Green. It is sure death to the potato, squash, and cucumber bugs, currant and tomato worms, also other plant and vine eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendency to assist growth. For potatoes a 12½-lb. package is sufficient for an acre. For spraying trees it has no equal. 1-lb. box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. box, \$1.00; 100-lb. case, \$7.00.
 - Perfection Shaker, 65 cents.
- Cow-oil-ene. Fly-oil for Cattle and Horses. This gave great satisfaction last season; it is absolutely harmless, easily applied, and a sure preventative. Per gal., \$1.00. Sprayer for same, 50 cents.
- "Nico-Fume." For fumigating green-houses. "Nico-Fume" is positively the strongest tobacco-paper on the market; does not injure blooms, and furnishes the easiest method of fumigation ever devised. Packed in special friction-top tins. 24 sheets, 75 cents; 144 sheets, \$3.50; 288 sheets, \$6.50.

INSECTICIDES.

A LIQUID INSECTICIDE

Nikoteen is composed of that element in tobacco which-gives its value as an insecticide and nothing else. The best Extracts of Tobacco contain from 1½ to 2½ per cent. of nicotine. This

preparation contains 40 per cent. nicotine. Is the cheapest, cleanest and most effective of insecticides and will not injure or discolor delicate plants. Pint bottle, \$1.50.

- Thymo-Cresol. A highly concentrated and powerful preparation for dipping or washing SHEEP, and for ridding all LIVE STOCK of Parasitic Vermin. It forms a Perfect Sheep Dip, as it is rapidly fatal to all the insect pests which infest domestic animals, but is at the same time quite harmless to the animals themselves and to man. The method of preparation is extremely simple, as it mixes at once with either cold or warm water. It contains principles which promote the growth of the wool. "The only successful sheep dip in use." Pint, 45 cts.; one-half gallon, \$1.00; gallon, \$1.75.
- Fir-Tree Oil. A preparation for destroying insects and parasites, such as mealybug, red spider, scale, thrip, green fly, fleas, etc. It answers every purpose as an insecticide, and when used as a wash for dogs or animals is harmless to the hands and skin. Full directions with each can. Half-pint, 50 cts.; pint, 75 cts.; quart, \$1.25; half-gallon, \$2.50.
- Tobacco Extract Rose Leaf. A perfectly pure, highly concentrated extract of Tobacco, always uniform in strength of Nicotine poison. Destroys green fly, mealy bug, thrip and red spider. Pint, 30 cts.; quart, 50 cts.; gallon, 1.50; 5 gallons, \$5.00.
- Sulpho Tobacco Soap. Manufactured from the essential oil of tobacco, for the destruction of all insects, parasites and their eggs. 3 oz. cake, 10c.; 8 oz. cake, 20c.
- Tobacco Dust (Pure). A sure remedy for green fly, cheaper than snuff and quite as effectual. 5 lbs., 25 cts.; 100 lbs., \$4.00.
- Tobacco Dust and Sulphur. Prevents and cures mildew, kills green and black flies and other insects; has the double advantage of being a fertilizer as well as an insecticide. 1 lb., 10 cts.; 100 lbs., \$6.00.
- **Tobacco Stems.** For fumigating. Invaluable as a mulch for rose beds, lettuce beds, etc., where insects frequently do much injury to roots or foliage. The best quality of stems supplied. Per barrel, \$1.00; in bales, 2 cts. per lb.
- **Little's Antipest.** A safe and sure preparation for the destruction of all insect pests, equally suitable for Greenhouse, Garden and Orchard. Pint, 60 cts.; quart, \$1.00; gallon, \$2.50.
- Bordeaux Mixture, Lion Brand. A valuable and indispensable fungicide for grape growers, ensuring larger crops and finer grapes, and preventing failure. Successful against black rot, mildew and rust. Being in liquid form it is very convenient to handle. One gallon will make fifty gallons of spraying liquid. Quart, 40 cts.; gallon, \$1.00.
- Paris Green. "Lion Brand," new process. This will be found superior to any other Paris Green yet offered; it is lighter in weight for a given quantity and more soluble. It is stronger in active poison, and adheres better to the foliage. Per lb., 45 cts.
- Whale Oil Soap. For destroying insects on plants, trees, vines, etc., and for washing the bark of trees. 1 lb., 15 cts.; 5 lb., 50 cts.
- Flour of Sulphur. Prevents and cures mildew on plants. Lb., 8 cts.
- Hellebore Powder. One of the best insecticides for Green Fly, Rose Slugs, Currant Worms and other insects. Lb., 30 cts.
- Persian Insect Powder. It is invaluable to the housekeeper for the destruction of Flies, Fleas, Roaches, and other insects. Lb., 50 cts.

INSECTICIDES, Etc.

Slug Shot, Hammonds. One of the cheapest and best powders for destroying the cut worm, potato bug, rose bug, rose slug, curculio, worms or caterpillars upon vines, tobacco, cotton or egg plants, currants and fruit trees. Is an excellent fertilizer, contains nothing injurious to domestic animals, and does not deteriorate by age. On low growing plants, it should be dusted on with a very fine sifter. On tall shrubs and trees, it should be applied with a bellows. Price, five lbs., 30 cents; ten lbs., 50 cents.

Grape Dust, Hammonds. A preparation for destroying mildew on grape vines. Can also be used on plants or trees affected with mould, mildew or rust miles, either in greenhouses or the open air. Its diffusibility is great, one part of Grape-dust will spread itself over a greater surface than sulphur. To be thoroughly effectual, it must be applied frequently by dusting, as atoms of fungi are always spreading or floating. Apply at the first appearance of trouble. Dust on a warm, dry day.

Price, five lb. package, 35 cents.

MORRILL'S CANKER WORM EXTERMINATOR.

A Sure Protection for Fruit and Ornamental Trees from the Ravages of the Grub and Canker Worm.

As easily applied as paint or whitewash, by first placing a band of tarred paper six inches in width, securely fastened, around the tree, four feet above the ground, and covering the paper thoroughly with the Exterminator, using a common paint brush.

LAWN MOWERS.

As our business is confined entirely to the best trade, that demand the best goods, we have decided to handle none but Coldwell's make of Lawn Mowers for the coming season. We have sold these during the past 6 years with better results than any other make, and we can thoroughly recommend them to be the best made, lightest running and best cutting machine on the market. The Horse Mower and Imperial Hand Mower are so well known that it is useless to comment on them here.

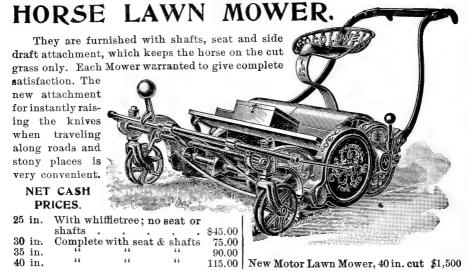

The Chain Roller Mower has been in use on the leading Golf Links during the past 3 years, and have proven themselves to be the best machine for this work. These

are the only machines made especially adapted to border cutting.

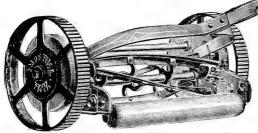

The Motor Mower is the latest invention of Mr. Coldwell; it cuts a 40 inch swarth, cost of fuel is 40 cents for 10 hours. For large places, where perfection of lawn is required, this machine not only cuts and rolls the lawn, but the engine, which is of four horse-power, can be utilized for cutting wood, pumping water, threshing or other work, without removing it from the Lawn Mower.

Absolute guarantee with every Lawn Mower. Satisfactory in every respect or no sale.

"COLDWELL" IMPROVED

COLDWELL'S IMPERIAL LAWN MOWERS.

market. The principal feature of these machines is that the bottom knife-bar is bolted to the sides, thus making the frame perfectly rigid, while by a new patent hanger the revolving cutter is adjusted to the bottom knife. This is the reverse of the adjustment in all other mowers. When the knives are properly adjusted a lock screw secures them in position.

IMPERIAL HIGH WHEEL.

Coldwell's Chain Roller Mower for Golf Links and Borders.

In addition to the usefulness of this Mower for regular lawn work, it will perfectly cut the grass on borders, even though they are narrow strips of sod between flower-beds and walks, where a side-wheel Mower would have one wheel off the border.

The Chain-Roller Mower is strictly high grade and should last for years. The chain, in place of gears, reduces the noise and friction. The Self-Dumping Grass Catcher is the best ever used.

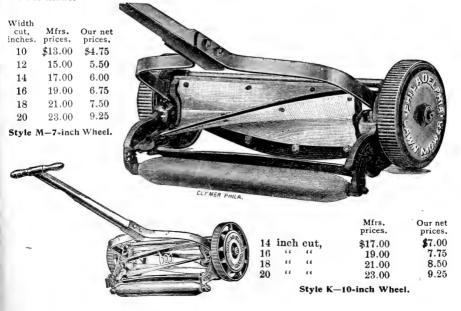

14 inch, 4 blades \$11.75, 6 blades \$12.50; 16 inch, 4 blades \$13.00, 6 blades \$13.50; 18 inch, 4 blades \$14.50, 6 blades \$15.00.

Grass Catchers. 14 inch, \$1.85; 16 inch, \$2.00; 18 inch, \$2.15 extra.

Grass Catchers for Imperial Mowers. 12 inch, \$1.70; 14 inch, \$1.85; 16 inch, \$2.00; 18 inch, \$2.15; 20 inch, \$2.30.

Philadelphia Lawn Mowers.

This mower is for general purposes, and very popular. It has 7-inch driving wheels, with three-blade cylinder, with the knives bolted on. The best solid wiper mower made.

Philadelphia 36-inch Horse Lawn Mower.

Mending Plyers, each, 40c.

Box containing 1 pair Plyers, 6 Metallic Tubes, and 12 Wires, either 1/2 or 3/4 in. size, per box, 75c. Hose Couplings. Common Brass, each, 20c.

COOPER HOSE MENDER.

No mechanical skill required to mend your hose. Cut out defective place in hose with sharp knife, leaving ends as square as possible, thus insur-ing close union. Dip ends in water if not already wet. In sert Mender a short distance at one end, then take the other piece of hose and do likewise. Take hold of each piece and push them on together, having them meet at centre of Mender

If hose does not go on readily, it can be twisted back and forth, until it meets, as above mentioned.

expect it to go on too easily, it can be twisted back and forth, until it meets, as above mentioned. Do not expect it to go on too easily, as there is great difference in the stability of hose, according to length of time it has been in use, and also the quality.

Persons following these directions will find after one trial that they make the hose as good as new, and with a few of them in their house when in need will cause the hose to last twice as long. Simple, effective, and practically inaestructible. Always stop the water at faucet, but never at nozzle, unless you want to spoil your hose, as the pressure to the square inch will range from fifty to ninety pounds.

Price, \$1.00 per doz.

SOD LIFTER.

Sprayer Insect Exterminator

Simple, practical, effectual. By far the most economical as well as the most effectual device for applying paris green, with little labor. Paris green applied with the Electric will kill potato bugs, all sizes and all ages, every time, and only one pound

required for an acre of potato vines.

Experience has proven that paris green applied in its pure, unadulterated state does not injure vines, and is far more effectual than when mixed with plaster or any other substance. Every farmer who once tries the Electric in killing potato bugs will

never do without it. Each, \$1.00.

Improved Electric Sprayer. Especially

recommended for spraying all kinds of plants, bushes, vines, and shrubs. The great improvement of this sprayer over others is that it can be used as well for powder as liquids and its moderate cost. Tin, each, \$1.00; Copper, each, \$1.25.

PLANT

Sprinkler, Scollay's Rubber. Made of rubber, with flat bottom, and a detachable brass top, finely perforated. Each, \$1.00.

Sprinkler, Scollay's Angle. For sprinkling under side of the leaves, designed for applying liquid insecticide or water. Price, \$1.00.

Sprinkler, Columbia Rubber. The bulb is made of soft rubber, the top of hard rubber with detachable screw cap, and is extremely useful for all purposes to which a sprinkler is put. Large size, 75c.; medium size, 50c.

Putty Bulb, Rubber. For applying putty to sashes. The putty in a semi-liquid state is ejected by pressing the bulb, enabling one to do the work very rapidly. Price, \$1.00.

Squilgees or Rubber Mop. Edged with pure rubber, 75c.

PLANT STAKES.

The Round stakes are light, very neatly turned, tasty, and suitable for plants in pots, also for Carnations, Gladiolus, and various other plants, in the open ground.

The Square Stakes are suitable for tying up Roses, Dahlias, Climbers, etc. *

Truckee pattern, solid cast steel. Per lb. 10c.

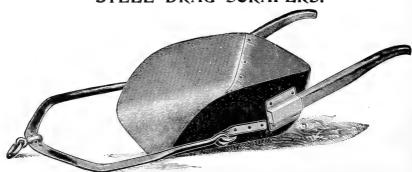

WATER BARREL TRUCK.

This truck is a great improvement upon all trucks hitherto offered. By means of a simple arrangement of the Axle, the Barrel can be detached at pleasure, whether full or empty. Any desired number of Barrels can be used with the same truck. This contrivance is very useful for carrying water to the garden or lawn during dry weather, for emptying cesspools, and for innumerable other purposes.

Water Barrel with Truck complete, \$10.50 Water Barrel with Trunions, \$2.75.

Box or Cart, with Trunions, \$3.50.

STEEL DRAG SCRAPERS.

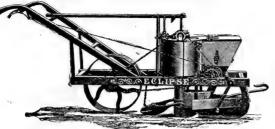

Our scrapers are shaped from a single sheet of cold steel, being lapped and riveted at the corners, thereby rendering them uniform in thickness throughout, except at corners, where they are of double thickness.

WHEEL SCRAPERS.

For township and general contract work. These we can offer in the following sizes: No. 1—Capacity, 10 cubic feet weight, 500 lbs. No. 2—Capacity, 13 cubic feet weight, 650 lbs. No. 3—Capacity, 17 cubic feet weight, 800 lbs. Prices on application.

Eclipse Corn Planter and Fertilizer Distributor Comb'd.

For planting Field or Ensilage Corn, Beans, Peas or Beet Seeds, in hills, drills or check, will accurately distribute all Commercial Fertilizer, Wet as well as Dry, Pulverized Hen Manure, Plaster, Ashes and other fertilizers of like consistency, with a certainty. Has concave places each side of plow, which are of great importance in placing moist earth on the seed, just before the

fertilizer is dropped each side of seed. A great advantage on very dry ground or in a dry season. Price, \$25.00.

King of the Cornfield Corn Planter and Fertilizer Sower Combined.

Plants Corn, Beans, Peas, Beet and Other Seed of Like Size.

Special award of the Maine State Agricultural Society of Grand Silver and Gold medals in 1892, '93, '94, '95. This is the only machine made that can plant two kinds The concave wheel covers the corn nicely. of seed in alternate hills. We have thousands of testimonials of their superior merits from dealers and users. Send for circular. Weight, 180 lbs. Price, \$25.00.

The Universal Weeder and Cultivator.

A perfect weeder for all hoed crops, and does away with the use of the hand hoe.

For putting in grain, grass seeds or millet, it has no equal; distributes the seed evenly and at a uniform depth. at the same time pulverizing the soil and forming a perfect seed bed.

We recommend the Weeder to all Market Gardeners as an implement well adapted to

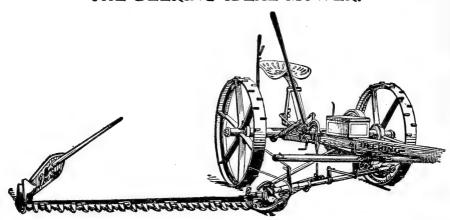

perform many kinds of work which generally takes a great deal of time.

Easy to operate. Light to handle. A great saver of time and money.

Permanent Tooth Weeder, \$4.50

Removable Tooth Wee Removable Tooth Weeder, \$5.50 Send for special descriptive circular.

THE DEERING IDEAL MOWER.

Weight properly distributed is absolutely essential in mowers to insure machines that will do satisfactory work under all conditions. The working parts of the Ideal Mower are made of the best steel, malleable and wrought iron. The pitman is long and strong, made of well seasoned second growth hickory. The wheels are high and powerful, are connected by a heavy steel axle. The frame is staunch and wide, striding the cut grass, so that the wheels travel in a clear track. Deering roller and ball bearings make the Ideal Mower so light in draft that it is a worthy example of the well known Ideal line of machines. Ideal Mowers have a perfectly floated cutter-bar; a coil spring not only assists the operator in raising the cutter-bar, but takes just enough of the weight of the cutter-bar off the ground to permit the bar to float with perfect ease and freedom. Price on application.

DEERING ONE-HORSE MOWER

has given entire satisfaction on farm, salt meadows and orchards. Many of the parks use it for cutting lawns and parks. Like the regular Ideal it is fitted with ball bearing rollers, long wooden pitman, forged steel couplings, a positive and direct stroke. Its action perfectly free, which makes it the most durable, easy of handling and lightest draft mower made. Cuts 3½ and 4 feet. The foot lift cannot be surpassed. The Deering Mower knives and section are made from a special grade of steel. They are stamped with the name Deering, a satisfactory guarantee. Price on application.

THE DEERING HAY TEDDER.

Light draft, noiseless, simple, durable and ease of operation are ample proof that the machine has been built on the right principles and out of the best material. Wheels high; forks on the outside; frame cannot twist or sag; spring steel fork; coil springs to prevent breakage. The frame tilts up, relieves the forks should they strike the ground.

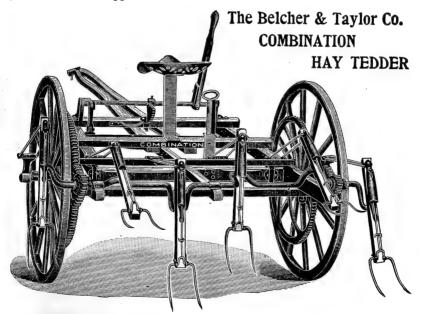

Combination thills and pole. Price on application.

THE DEERING IDEAL HAY RAKE.

A rake must be strong, simple and durable to make it valuable. The Ideal Rake is noted for those qualities. They are constructed of the best steel. The angular steel parts are hot riveted instead of bolted, which renders it less liable to get out of repair. The wheels are interchangeable, and are the strongest ever put on a rake. The teeth are made of the finest oil tempered

spring steel. Operator may adjust the rake to regulate the height of the teeth and the time of their return to the ground. Combined pole and thills are furnished with every rake. Price on application.

Intermediate and crank gears are covered with shields not shown in the above cut.

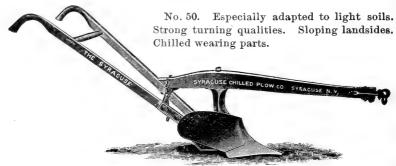

In the construction of this machine, all the best features of the Improved Bullard and Mudgett Tedders are used, with valuable improvements of our own, and our aim to make a tedder that will be more durable and cost the user less for repairs than any machine now on the market, we believe has been fully accomplished. Price on application.

We are New England Headquarters for the SYRACUSE CHILLED PLOW CO., and carry in stock a full line of Plows, Harrows, Cultivators, Drag Scrapers, Wheel Scrapers, Steel Wheelbarrows, Canal Barrows and Hand Push Carts. Also a full line of repairs in stock.

No. 5 Vineyard and Garden Plows. Chilled wearing parts. The most popular plows in use in vineyards and hop yards. Horse can walk in the furrow or on the

land. Handles can be adjusted sideways or up and down.

SYRACUSE REVERSIBLE SULKY PLOW.

STEEL MOLDBOARDS AND STRIPS. CHILLED OR STEEL POINTS.

Does perfect work on hillside or level land. No ridges or dead furrows. Light and strong. Simple and practical. Power lift for raising the plows. An adjustable pole regulates the width of furrow, also avoids all side strain on the team. Lighter in draft than a hand plow doing the same work. (Send for special circular.)

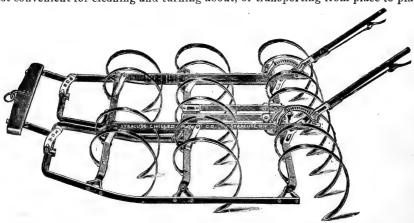

With each Sulky is furnished two extra Cast Points, two extra Jointer Points, a Screw Wrench, Neck Yoke, and Two Horse Whiffletrees.

If it is desired to use three horses on the above Sulky, attachments can be furnished when ordered. Price, \$45.00.

SYRACUSE SPRING TOOTH HARROWS, WITH LEVERS.

Frame, Tooth-bearing Bars, and Teeth are Steel. The frame runs on Steel Shoes, which can be renewed at small expense. All castings Malleable. Superior work. Most convenient for cleaning and turning about, or transporting from place to place.

SYRACUSE STEEL FRAME CULTIVATORS.

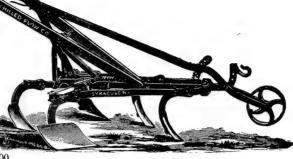

We would call particular attention to our superior form of construction, by which the Cultivator may be varied from the narrowest to its widest position with one motion and with no change of bolts, and when closed up does not get on dead centre or become difficult to open.

No. 138. Expanding Lever. Five 3 in. P'ts., Wing Points, Shove! Points and Lever Wheel, \$7.50

No. 33. Expanding Lever. Five 3 in. P'ts., Wing Points, Shovel Points and Stationary Wheel, \$7.00

No. 53. Five 3 in. P'ts., Wing Points, Shovel Points and Wheel, \$6.00

No. 81. Five 3 in. Points and Wheel, \$4.50.

These Cultivators are made with an extra

long and heavy frame and are fitted up with Jersey Points and long Hiller Sweeps which are unsurpassed for hilling-up potatoes and other crops.

With the standards and points removed, excepting the one on the centre bar, the Cultivator is formed into a Furrowing Plow; or by reversing the sweeps and fastening the centre standard at the rear end of the bar it is changed to a Coverer.

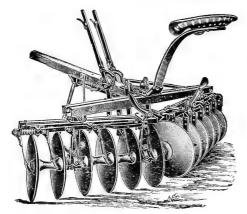

No. 101. Expanding Lever, five Jersey Points, Hiller Sweeps and Wheel, \$7.50.

No. 156. Expanding Lever, five Jersey Points, Hiller Sweeps and Lever Wheel, \$8.50.

SYRACUSE SPIKE TOOTH CULTIVATORS.

Especially adapted to pulverize the soil and leave it smooth and level. The teeth are reversible and the pitch can be quickly changed forward or back by simply loosening one bolt at each tooth. REPAIRING No. 111. Fourteen Spike Teeth and LAWN MOWERS. Wheel, \$5.50. No. 114. Expanding Lever, Fourteen Our Skilled Mechanics, Experience and Tools place us in the best pos-Spike Teeth and Wheel, \$6.25 sible position for doing this class of work with promptness and satisfac-tion. Send your machines AS SOON AS POSSIBLE. We will store them through the winter, if you desire, without charge, and return them when wanted in first-class con-

SYRACUSE ALL STEEL-FRAME DISC 'HARROW.

For Crushing Clods,
Pulverizing Hard=Baked
Clay Land, or Cutting up
Sod Ground
No Harrow Rivals the
New Syracuse.

We show in the above the new Syracuse Steel-Frame Disc Harrow with double lever.

The Frame, both in the crosshead and gang beams, is made of double bars of highly tempered angle steel, giving both strength and rigidity. Attached to the Frame are steel arms which connect the bearing boxes. Each Gang has a double-jointed hinge which acts vertically and horizontally, giving flexibility and free action when working on uneven ground. By means of the adjustable hold-down casting at the inside ends of the Gangs, the Harrow can be made to cut at a uniform depth the full length.

Draft.—The Harrow draws direct from the axle, which, in connection with the excellent bearings of the Syracuse, obviates all tendency to side draft or neck-weight

of the pole.

Levers.—The Levers are placed within easy reach, and each gang moves separately, so that they are easily operated. The Gangs can also be set at different angles, when necessary, which is an invaluable feature when working on side-hill or rolling land

The Scrapers of the Syracuse are known as the individual Gang Scraper, one for each Disc, with shanks of tempered spring steel, with long controlling rod, held in position by a secondary spring, and operated by a pivoted foot treadle at the end.

Discs.—Oil-tempered Steel Discs, either round or cut, are furnished, the latter

being sent only on special orders.

The Hitch.— As shown in our cut above, the Harrow is arranged for a two-horse hitch, but we furnish same with three or four-horse hitch if so specified. For the three-horse hitch we furnish an extra crossbar and whippletree to be attached to the side of the pole by an extra casting, thus making a perfect arrangement and avoiding all side draft.

We furnish the cut-away Disc as well as the plain ones when so desired.

The following sizes are furnished:

12 16-inch Discs, cuts 6½ feet.

12 16-inch Cut-away Discs, cuts 61/2 feet, complete.

REPAIRS.

We carry a full line of repairs for all the leading Plows, Cultivators, Harrows,

Mowing Machines, Rakes, Tedders, etc.

We have greatly enlarged our repairing department, and with our skilled mechanics, who have had many years' experience at this kind of work, we are now placed in the best possible position for repairing of all kinds of farm and garden tools and implements. We devote special attention to this feature of our business, and can do first=class work at reasonable prices.

We make a specialty of repairing Lawn Mowers, and, as we carry a complete stock of repairs for all leading machines, we are enabled to ship promptly and guar-

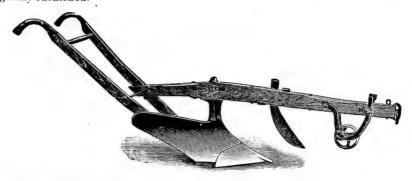

antee every machine we repair to work in a satisfactory manner.

HUSSEY HARD METAL PLOWS.

Superior workmanship, strength, durability, lightness of draft, thoroughness of work, scouring capacity in every kind of soil, steadiness in the ground, and facility of adaptation to all kinds of work, are the qualities possessed by the Hussey Plows. and which have made them such favorites among farmers and dealers.

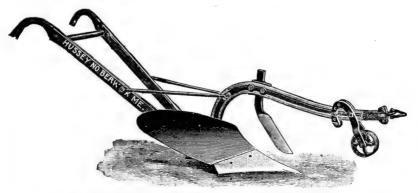

Among the recent improvements added to our Plows, we might mention that we are using a Solid Steel Cutter, and Steel Truck-Straps, and that we have lengthened the Iron Strap under the Beam so that it now extends from the standard to the Clevis.

Any information about our Plows or Cultivators, not given in this catalogue will be gladly furnished.

We savry in stock a full line of Hussey Repairs, both for Plows and Cultivators.

"IRÓN AGE" CULTIVATORS, ETC.

For general work there are no hand tools made to compare with the "Iron Age." They do the work. All the tools are built of the best possible material and the prices are as low as such high grade stock will admit of.

THE NEW MODEL SEED DRILL.

This we consider the simplest and best drill on the market. The diamond-shaped adjustable hole regulates the discharge, and can be made larger or smaller, as occasion requires. No other drill has this advantage. The seed cut-off claps up underneath the hole; it does not slide under the same, as in other similar drills; on this account it does not clop nor cut the seed. It has a broad wheel and a covering roller. The opening plow is adjustable in depth. The whole make-up of the drill is simple. It can be worked by any one. Price \$7.00.

THE "IRON AGE" DOUBLE WHEEL HOE.

At a glance one can see the great usefulness of this tool. The garden or farm is incomplete without at least one of these tools. In cultivating onions, beets, turnips, radishes, etc., it is invaluable; saves hours of hard labor and does the work better than

several men could do it in the same time. One great advantage which this double wheel hoe possesses is that it can be made into a practical single wheel hoe in a moment's time. axle is sent with every double wheel hoe for this purpose. The wheels are sixteen inches high, enabling the wheel hoe to run easy and without yielding to the depression's of the soil, as a low wheel will do. The frame being made of tubing coupled to malleable castings gives great strength, together with lightness. All the tools shown in the cut go with the machine for the price, \$6 50.

In order to accommodate those who have only use for the wheel hoe for hoeing, we offer the machine described above, with hoes only, at \$4.00.

THE "IRON AGE" SINGLE WHEEL HOE, CULTI-VATOR, PLOW, AND RAKE.

This tool is, in regard to the work done, almost a counterpart of the Double Wheel Hoe, and the same remarks as to its construction, extreme lightness, and ease of operation will apply with equal force. In addition, its lower price, less weight, and increased steadiness given by a single wheel make strong arguments in favor of this tool. For the small kitchen garden we consider the single wheel hoe very valuable. The work is done principally between the rows, although the plants of small growth can be hoed on both sides at once by placing the wheel on the left

side. With this single wheel tool, spaces of exceedingly narrow width can be worked, even using but one cultivator tooth. With the large plow attachment, deep furrows can be opened or closed; potatoes, celery, and other crops hilled; in short, all such work usually accomplished by a special plow. Packed weight, 28 pounds. Price, \$5.00.

work usually accomplished by a special plow. Packed weight, 28 pounds. Price, \$5.00. We also have a weeder attachment for this tool similar to the ones used on the Double Wheel Hoe, a capital thing. Price, \$1.00.

For complete description of following list of Iron Age Tools please send for catalogue; we carry a complete line of Iron Age repairs in stock.

THE "IRON AGE" COMBINED BARREL TRUCK, HAND CART, LEAF RACK

When we consider the almost innumerable uses to which our Combined Truck and Hand-cart can be applied, its "handiness" and the immense amount of time and hard labor saved by its use, it is not a matter of surprise that it is steadily growing into popular favor. It is one of those

articles that cause the user to wonder how he ever did without it, as it really becomes indispensable when once used.

Kaffir Corn. Per 100 lbs., \$3.50.

Wheat. Market price.

Nest Eggs. China. Per dozen, 40c.

Cornell Egg Tester. Each, 50 cents.

PEEP-O'-DAY FOUNTAIN.

This fountain we have made for years and have never found a more practical one for chickens or ducks. It keeps the water cool and clean, and the entire inside of the saucer and jug is easily cleansed, the jug being open at the bottom.
